Local News.

There are large quantities of new potatoes in the market.

The Attorney General is attending the Westmoreland Circuit Court.

Mr. John Black returned yesterday from a trip to the Northern Counties.

The regular monthly meeting of the City Council will be held next Tuesday evening.

Mr. William Calder is building a handsome little sail boat for Mr. George Armstrong of this city.

We have been shown some fine heads of early cabbage grown by Mr. C. E. Grosvenor of Canterbury.

Rev. Mr. Brewer preached in the Methodist Church last Sabbath morning, and had a large congregation.

Mr. Inches went to St. John yesterday, and will be absent two or three weeks on Exhibition business.

Mrs. Judge Wilmot, at present residing at Halifax, has made a donation to the New Methodist church at Lincoln.

Persons owning dogs will remember that unless the tax on those animals is paid this week, a fine of $4.00 will be imposed.

Is it not time the Sunday Schools of the City, had made some definite arrangement for the celebration of Reike's Centennial.

Capt. Myshrall and his lady are spending a few days in this city, and are the guests of Joseph Myshrall, Esq., the Capt's. father.

The New School House at Gibson, is rapidly nearing completion exteriorily. It will be ready for occupation November 1st.

On Tuesday next an eleven from the Union Club, will play the eleven chosen to compete with the St. John team on Thursday.

Lieut. Governor Wilmot is expected home from Ontario next week. We are glad to learn that His Honor's health is much improved.

It is said that the Masonic body will hold a mammoth picnic, during next month. We have no doubt the affair, if undertaken, will be successfully carried out.

Mr. James Hodge's "Model Warehouse," has been replenished, recently by the arrival of about five tons of the best qualities of teas. His wareroome are a busy mart.

The Bonnet Hop at the Exhibition Palace last night was quite a success. The 71st Batt. Band performed a programme with its usual success. Dancing was indulged in from nine p. m., till midnight.

Mr. Rusl will shortly ship his ice from Oromocto to New York, having received splendid offers for it. He has nearly 3000 tons, and will require a fleet of fifteen schooners to carry the ice to its destination.

The Union Cricket Club of this city, challenged the St. John Club last Friday, for a match here on the 5th of August, but as yet have received no reply. Do the St. John cricketers intend accepting the challenge?

We are glad to hear of the prosperity of the Fredericton Leather Company, as instanced by the dividend shortly to be paid its Stockholders. A leading Director of the Company assures us that to the N. P. the organization owes its success.

The Carleton Serenade Band had an excursion to this city yesterday, about 250 persons arriving by special train at 11 a. m. The party had lunch at the Exhibition Building, and during the day visited interesting points in the city and vicinity. For the most part the excursionists were well behaved, but we have heard of the gross misconduct of numbers of them.

Two elevens from the Union Club played a cricket match on the Square, Monday afternoon for a ball presented by Capt. Loggie. The respective teams were captained by C. L. Richards, and M. J. McLaughlan. The latter's eleven scored 115 against 60 made by their rivals, and carried off the prize, Ned O'Brien of the winning team making the highest individual score, 25.

The rain of Tuesday afternoon and evening put a stop to the Reform Club Band's regular weekly open air concert, and the absence in St. John of some of its members, prevented the performance being given last night as was intended. On Tuesday evening next in Officers Square, the Band will make up the deficiency by rendering a choice programme embracing several new and popular selections.

We understand that Mr. George Miles, of Lincoln, Sunbury County, is doing quite an extensive business in preparing Salmon and Sturgeon for the American market. Sturgeon have never been so plentiful in the St. John river, as this season, and the curing of them is becoming quite an important enterprise. A party of Germans have established themselves at Oak Point, and are making large catches.

We regret that through some mishap, last week's issue of the MARITIME FARMER did not reach our subscribers at Harvey Station. However, the omission, wherever it was caused had the effect of giving us an idea of how highly our weekly visits to Harvey are appreciated. A gentleman in that locality writes to us to say that last week's bundle failed to arrive there, and closes with "please send me a copy as we cannot do without the FARMER."

The Original Base Ball nine left by the May Queen at 4.30 p. m. yesterday for St. John, and are playing the Nationals of that city this afternoon. Mr. H. McL Balkham the well known pitcher of the now defunct Mutuals accompanied the Originals. Quite a number of excursionists took advantage of the cheap fare offered by the May Queen, and went to St. John to see the Northampton, which is creating quite a sensation in our sister city.

We may say to our contemporary the *Reporter*, that we did not *boast* of our circulation but simply stated a fact that cannot be denied. With our contemporary we consider ourselves a Maritime journal, but as well a "local rival." Our success in the latter *role*, during but a short existence is successfully demonstrated by our circulation in York County, which we are prepared to wager is much larger than that of the *Reporter*. We hope this will be sufficiently explicit.

The clerks in the Post Office in appreciation of Mr. Thorne, the retiring Postmaster, and as a souvenir, on Saturday evening presented him with a flattering address, accompanied by a very handsome Silver Ice Pitcher, neatly engraved with his name and the names of the donors, and other circumstances of the presentation. The Address was read by Mr. Vavasour, and Mr. Thorne feelingly replied, referring to the excellent understanding that had always existed between himself and his subordinates in the Post Office, and the regret he felt at parting with them.

The workmen on the New Parliament Building have put up, and have now in use the largest derrick in the Province. It is capable of raising ten tons, and a similar one will be erected in a few days. We are assured that if the Government intend laying the Corner Stone with ceremony, any, further delay will intefere with the work.

In the absence of the Lieut. Governor, Admiral McClintock who is now at St. John with his flagship, the Northampton, might have been invited to lay the Corner Stone. An excursion could have been arranged from St. John, and the occasion made one of great demonstration and worthy of remembrance.

Mr. Langevin, Under-Secretary of State, writes to the Mayor of Guelph, Ontario, in reply to a petition from that town asking the Dominion Government to pass an act, to remove doubts as to the legality of taxing Dominion officials for Municipal purposes. This letter, we presume, finally settles the question, deciding that Dominion officials are not liable to taxation on income. The matter was settled in the courts to that effect, in Ontario during 1878, and the ground now taken by the Government, is that Parliament cannot be asked to declare *legal* what the Courts have declared *illegal*. No doubt this will be good news to the Dominion Officials of this city, the majority of whom have protested against the payment of their taxes. The petition of the Fredericton City Council is not likely to have any greater effect than Guelph's.

The 71st Batt. Band will play in the Square to-morrow evening.

Our citizens are anxious to see work resumed on the New Post Office.

The St. John *Daily News* is one of the most thievish and ill-mannered journals in in newspaperdom. It is none of our business if it does appropriate bodily, Fredericton news, from its City contemporaries, particularly the Supreme Court reports without giving credit therefor; but we do enter our protest against its taking a weekly budget of news items from the MARITIME FARMER and crediting it to the Fredericton papers, or worse, as it does very often, presenting sometimes a half column from us without even hinting the source from which its information comes. But we have to add that the *News* beside plagiarizing to the extent noted, takes the trouble to correct us in two instances especially, and on both occasions falls into error. We do not claim infallibility, but will place our reputation for veracity with that of the *Daily News* and allow the public to judge which journal is the most reliable.

Plague of Locusts in Russia.

One of the old plagues of Egypt, the plague of locusts, appears to have lately revived around the Caucacus and along the Volga, and this not in mere metaphor but in literal fact. The scourge is still exhausting the country, and the Russian authorities have called out the military, and pressed the peasants also into the service, in order to destroy the clouds of insects which are eating up every green thing which they can find. Entomologists describe the pest as the true Egyptian locust. It measures about two inches long, with body of a light grey colour, and the wings of a dark green. It seems to travel in dense swarms which darken the air, and cover a space varying from one square mile to a hundred square miles. More than 5,000 persons are engaged in the work of destruction in one place, 3,000 in another, and smaller numbers in some 200 or 300 other localities, each person being armed with a heavy bunch of twigs tied closely together, something like a big broom, and exterminating about half a cwt. of the insects daily. Once the locusts alight they remain stationary untill nearly all are killed, no more than ten or fifteen per cent. of the swarm escaping, and thousands of tons of them have thus been already banished. When the process of pounding the insects has concluded, the appearance of the ground is as if it had been littered all over with wine lees and the refuse of grapes, and although the trouble of extermination is harrassing and tedious, nevertheless the ground must be greatly enriched by this new and strange fertilizer which necessity compels the inhabitants and the authorities to apply to it.

Origin of the Union Jack.

Before the crowns of England and Scotland were united under James I., the flag carried by English ships was white, with the red cross of St. George emblazoned on it; and that hoisted on board the ships of Scotland was blue with the cross of St. Andrew on it; the red lines of the first being perpendicular and horizontal, those of the latter diagonal. Some differences have arisen between the ships of the two countries. His Majesty, to prevent this in future, and to teach his people that they formed one nation, ordained that a new flag should be adopted having the cross of St. George interlaced with that of St. Andrew on the blue ground of the flag of Scotland. All ships were to carry it at the main-masthead, but the English ships were to display the St. George's red cross at their sterns, and the Scottish that of St. Andrew. On April 12, 1606, the Union Jack was first hoisted at sea, but it was not till the Parliamentary union of the two countries in 1707 that it was adopted as the military flag of Great Britain. Both services, therefore, now use it as the national banner.—

Six men and two women belonging to the Yuma and Maricopas tribes of Indians in South Arizona are being taken through the States, giving exhibitions of marvellous speed in twenty-mile runs. They were formerly mail carriers and were engaged by enterprising speculators for the tour, which is to be extended to Europe. Four times they have competed against white men and each time have left the pale faces a long way in the rear. The men are nearly all six feet in height, straight, and finely built, with strong, long limbs, and small hands and feet. Unlike the majority of Indians, they have bright intelligent faces. The women are about five feet one or two inches in height, slender in build, supple and active in their movements. The intention is, it is understood, to offer a general challenge to any white men or women who may wish to try their powers of endurance and speed. The Indians are now at Chicago.

The vaults of the Washington Treasury now contains $70,000,000 in silver coin for which there is no demand, and every month the amount is increased by an additional two millions, according to the law of February, 1878. The dilemnia in which the authorities find themselves placed is a serious one. No one wants the silver, but they are compelled by law to keep on coining. The payment of the bonds in gold, instead of partly in silver, which might be employed without violating the contract, is one great cause of the accumulation. It is feared that on the first unfavorable commercial symptoms the gold, as before, will leave the country, and the silver remain the only available coinage for the redemption of the greenbacks.

There are 20,160,000 acres of land in Ireland. Of this one landlord owns 170,000 acres; 292 own one-third of the island, 744 one-half and 1,942 over two-thirds. Of the 1,942, 1,727 are absentees; and if it be true that property has its duties as well as its rights, they have much to answer for. The Duke of Sutherland owns 1,500,000 acres in Scotland, and 2,000,000 acres in that country have been depopulated and turned into deer parks. Forty-five hundred persons own two-thirds of all the land in England. The House of Lords owns one-third of all the land in Great Britain, and two-thirds is held by peers and great commoners. Feudalism is a big tree.

A person charged with the illegal sale of liquor in Montreal escaped conviction by a very peculiar defence. It was proved that the liquor had been sold by the prisoner's wife, which according to the Act was sufficient to convict. The counsel for the defence contended that the evidence was defective, as there was no proof of the marriage of the parties. He stated that he himself was satisfied that they were man and wife, but insisted upon the prosecution adducing legal evidence of the fact, and as they were unable to do this the case was dismissed

Since the close of the American war $200,000 has been sent by unknown parties to the United States Treasury department, and placed to the credit of the "conscience fund." Once $11,000 was received in one day, and several times the receipts have been $5000 for a single day. Sometimes the person sending it confessed he had smuggled or defrauded the internal revenue, but generally all that is said is "this belongs to the government."

A strange accident happened to a horse belonging to Napoleon Loud, at Lawrence, on Saturday. While in his stall he put his tongue through a crack in the partition that separated him from another horse, and the tongue being caught in such a manner it could not be extricated, the horse pulled with such force that the member came out by the roots. The animal was killed.

Official returns give the population of Boston as 363,565, being an increase of 71,066 in ten years.

This year's yield of tea in India is estimated at 70,000,000 pounds, nearly double that of 1878. Ten years ago it was under 14,000,000.

The largest number of votes polled by any candidate in the last English election was polled by Mr. John Slagg, M. P. for Manchester—24,918.

A jam of logs in the Aroostook Falls contains nine million feet of lumber. It is forty feet deep in some places, and extends back from the falls about one mile.

An ordinary womans' waist is thirty inches around. An ordinary man's arm is about thirty inches long. How admirable are thy works, O nature!

To walk the water, not like, but literally, a thing of life, has long been the ambition of mankind, and numerous have been the devices for accomplishing it. A young man named Soule has just achieved the feat of crossing the Harlem, above High Bridge, on a pair of boats, or skates, as he terms them, each five feet long, by about ten inches broad and five deep. These instruments have sockets for the feet, and they are not lifted, of course, from the water, in which the greater part is submerged when the traveller is afloat, but are pushed on by an ingeniously working set of paddles hanging from the bottom of the skate.

COUGHS.—"*Brown's Bronchial Troches*" are used with advantage to alleviate COUGHS, SORE THROAT, HOARSENESS and BRONCHIAL AFFECTIONS. For thirty years these Troches have been in use, with annually increasing favor. They are now new and untried, but, having been tested by wide and constant use for nearly an entire generation, they have attained well-merited rank among the few staple remedies of the age.

THE THROAT.—"*Brown's Bronchial Troches*" act directly on the organs of the voice. They have an extraordinary effect in all disorders of the Throat and Larynx, restoring a healthy tone when relaxed, either from cold or over-exertion of the voice, and produce a clear and distinct enunciation. *Speakers and Singers* find the Troches useful.

A COUGH, COLD, CATARRH or Sore Throat requires immediate attention, as neglect oftentimes results in some incurable Lung Disease. "*Brown's Bronchial Troches*" will almost invariably give relief. Imitations are offered for sale, many of which are injurious. The genuine "*Brown's Bronchial Troches*" are sold *only in boxes*.

The Common Expressions, "*I feel so dragged*," "*My food don't digest*," "*I do not feel fit for anything*," which we so often hear during the *Spring and early Summer* months are conclusive evidence that the majority of people require at that season especially a *reliable* medicine that will *strengthen the organs of digestion*, stimulate the *circulation of the Blood*, and "tone up" the debilitated constitution.

Hanington's "Quinine Wine and Iron," taken according to directions, produces *buoyancy of spirits, vigor of mind* and gives *lasting* strength to the whole system. Price 50 cents per bottle—6 bottles for $2.50. All druggist sell it.

A Good Thing.

German Syrup is the special prescription of Dr. A Boschee, a celebrated German Physician, and is acknowledged to be one of the most fortunate discoveries in Medicine. It quickly cures Coughs, Colds and all Lung troubles of the severest nature, removing, as it does, the cause of the affection and leaving the parts in a strong and healthy condition. It is not an experimental medicine, but has stood the test of years, giving satisfaction in every case, which its rapidly increasing sale every season confirms. Two million bottles sold annually. Beware of medicines of similar names, lately introduced. Boschees German Syrup was introduced in the United States in 1868, and is now sold in every town and village in the civilized world. Three doses will relieve any ordinary cough. Price 75 cents. Sample bottle, 10 cents.

Mothers! Mothers!! Mothers!!!

Are you disturbed at night and broken of your rest by a sick child suffering and crying with the excruciating pain of cutting teeth? If so, go at once and get a bottle of MRS. WINSLOW'S SOOTHING SYRUP. It will relieve the poor little sufferer immediately—depend upon it: there is no mistake about it. There is not a mother on earth who has ever used it who will not tell you at once that it will regulate the bowels, and give rest to the mother, and relief and health to the child, operating like magic. It is perfectly safe to use in all cases, and pleasant to the taste, and is the prescription of one of the oldest and best female physicians and nurses in the United States. Full directions for using will accompany each bottle. None genuine unless the fac-simile of CURTIS & PERKINS is on the outside wrapper. Sold by all Medicine Dealers. 25 cents a bottle. Beware of imitations.

WHAT THEY SAY OF IT? A FEW FACTS FOR THE PEOPLE.—There are but few preparations of medicines which have withstood the impartial judgement of the people for any great length of time. One of these is Dr. Thomas' Eclectric Oil. Read the following and be convinced:—Thomas Robinson, Farnham Centre, P. Q., writes, "I have been afflicted with rheumatism for the last ten years, and have tried many remedies without any relief, until I tried Dr. Thomas' Eclectric Oil, and since then have had no attack of it. I would recommend it to all."—J. H. Earl, Hotel Keeper, West Shefford, P. Q., writes—"I have been troubled with liver complaint for several years, and have tried different medicines with little or no benefit, until I tried Dr. Thomas' Eclectric Oil, which gave me immediate relief, and I would say that I have used it since with the best effect. No one should be without it. I have tried it on my horses in cases of cuts, wounds, etc., and think it equally as good for horse as for man."—A. Maybee, Merchant, Warkworth, writes, "I have sold some hundreds of bottles of Eclectric Oil, and it is pronounced by the public, 'one of the best medicines they have ever used:' it has done wonders in healing and relieving pain, sore throats, etc., and is worthy of the greatest confidence."—Joseph Rusan, Township Percy, writes, "I was persuaded to try Dr. Thomas' Eclectric Oil for a lame knee which troubled me for three or four years, and I never found anything like it for curing lameness. It is a public benefit."

BEWARE OF IMITATIONS.—Ask for Dr. Thomas' Eclectric Oil. See that the signature of *S. N. Thomas* is on the wrapper, and the names of Northrop & Lyman are blown in the bottle, and *Take no other*. Sold by all medicine dealers. Price 25 cents. NORTHROP & LYMAN, Toronto, Ont., Proprietors for the Dominion.

NOTE.—*Eclectric*—Selected and Electrized.

ESTABLISHED FACTS ABOUT

Carter's Writing Inks and Mucilage.

FIRST—That Carter's Inks and Mucilage have been exhibited for competition at all the leading Expositions of the United States for the past twenty years; also at the Centennial Exposition at Philadelphia, and at the Paris Exposition of 1878, and that in no instance, either at home or abroad, have they failed to take the HIGHEST AWARDS. SECOND—That we are the only American manufacturers of Inks and Mucilage who have ever taken the highest awards at a European World's Fair. THIRD—That in a recent canvass of our 30,000 banks and leading business houses in the United States, more of Carter's Inks were found in use than of all other American Inks combined.
