OF INTEREST TO GAS CONSUMERS. A Simple Apparatus That Will Reduce a Gas Bill By From 20 to 50.

Most of our readers will recollect the general dissatisfaction that existed throughout the city last spring relative to the excessive gas bills that were rendered to people living in different parts of the city, the northeast especially.

The manager of the Consumers' Gas Co. explained the chief cause of the trouble by stating that new mains had been recently laid in that district, which occasioned a large increase in the pressure. The gas company claimed that they were unable to regulate the pressure so as to satisfy all parts of the city, and in order that some sections should have light at all it was necessary that other sections should be cut off.

It will be satisfactory to those citizens who felt themselves overcharged to know that a simple expedient is available to people living in different parts of the city, and the gas can be consumed in a most economical and profitable manner.

A company has been formed in Toronto for the purpose of introducing a simple expedient to the consumers of gas, which, it is claimed, will enable the consumer to burn gas as economically as possible.

The company is styled "The Citizens' Gas Control Company" and it has opened an office at 11 Bay-st. under Mr. Jorgensen, as local manager.

The general manager of the company is Mr. Peterson of Montreal, whose head office is located in that city. Mr. Peterson has been in town since Monday and is in charge of the introduction of the new apparatus.

Mr. Peterson has been in town since Monday and is in charge of the introduction of the new apparatus. He has been in town since Monday and is in charge of the introduction of the new apparatus.
