HOW MRS. BOYD AVOIDED AN OPERATION

Canton, Ohio.—"I suffered from a female trouble which caused me much suffering, and two doctors decided that I would have to go through an operation before I could get well. My mother, who had been helped by Lydia E. Pinkham's Vegetable Compound, advised me to try it before submitting to an operation. It relieved me from my troubles so I can do my house work without any difficulty. I advise any woman who is afflicted with female troubles to give Lydia E. Pinkham's Vegetable Compound a trial and it will do as much for them."—Mrs. MARIE BOYD, 1421 5th St., N. E., Canton, Ohio.

Our Aim—Satisfaction
WATFORD SHAVING and HAIRDRESSING PARLORS
Hot Baths and Laundry agency in connection.
Dry Cleaning a Specialty.

Auctioneer
J. F. ELLIOT.
Licensed Auctioneer
For the County of Lambton.

PROMPT attention to all orders, reasonable terms. Orders may be left at the Guide-Advocate office.

RAISE PIGS PROFITABLY

Mustard Can Be Controlled by Spraying.

Spray Should Be Applied on Calm, Clear Day as Soon as First Few Mustard Plants Show Flowers.

(Contributed by Ontario Department of Agriculture, Toronto.)
ANIMALS, no matter what kind, always put on weight the most cheaply when they are young and the younger they are the cheaper the gains. As a consequence of this it is essential that the man raising young stock realize this and give a reasonable amount of attention to the young animals he is expecting. A few days before farrowing the sow should be brought into the pen so that she may become accustomed to her surroundings. A close watch should be kept on her during these days in order to ward off constipation, which is the bug-bear of a great many swine breeders. Once this condition occurs very little can be done, so it is a matter of prevention rather than cure. When the animal is taken into the new quarter her feed should be sloppy and of a laxative nature, a liberal supply of roots and a small amount of linseed oil meal helping to bring about this condition. The meal ration for a brood sow may consist of equal parts ground oats and wheat middlings.

At the time of farrowing the sow should be left alone but the attendant should be keeping a watch on her to see that no trouble arises. After farrowing the sow should not be disturbed for ten to twelve hours and her first feed should be little more than a drink of water with a little middlings in it. After this the ration may be increased to full feed, taking eight to ten days to do so. When the young pigs are weaned the ration should be cut down to stop the secretion of milk and, if it is necessary, turn the sow in with the young pigs once a day for a few days.

If, when the pigs are born, they are weak and straggling and vigorous they should be left alone for a while and as soon as the right time arrives they should be placed to the teat to suck as soon as possible. If the pigs are vigorous and healthy, nothing special need be done for them until they are two or three weeks old, by which time they should have learned to eat a little bit by picking around their mother's trough. At this time, if it is convenient, a small trough, away from the large trough, should be provided and the youngsters should be given skim milk with a little middlings stirred into it. As the pigs grow older more middlings may be stirred into the milk.

Outdoor exercise is very important for young pigs and every means should be used to induce the young pigs to take it, but precautions must be taken to protect the youngsters from cold winds and the hot sun. If the sow is turned out with the pigs she should not be given too much range at first unless the little fellows become unduly tired as a result of travelling too far.

Boar pigs not intended for breeding purposes should be castrated before weaning to get the best results, though there is not much danger in castrating at a later date provided care is observed in connection with the operation. Clean hands and instruments and disinfectant on the wound will overcome all danger of infection.—J. McBeath, B.S.A., O. A. College, Guelph.

Spraying With Iron Sulphate to Prevent Mustard From Seeding

Iron sulphate or coppers can be successfully used to prevent Mustard from seeding in standing grain without injury to the crop.
Preparation of Solution.—A 20 per cent. solution should be applied. This can be prepared by dissolving 80 lbs. of iron sulphat in 40 gallons of water. Iron sulphate is dissolved quite readily in cold water. The solution should be strained through a cheese cloth, as it is put into the spray pump tank. This will remove dirt and small particles that are apt to clog the nozzles.

Time to Apply.—Apply on a calm, clear day just as soon as the first few plants in the fields show flowers. It is very important to spray early. If the plants are left too long the treatment is not nearly so effective. If a heavy rain comes within 24 hours after the solution is applied, it will be necessary to spray again.

How to Apply the Solution.—An ordinary hand-pump barrel sprayer, such as is employed to spray fruit trees may be used, or a potato sprayer can be rigged up to do the work. Many of the up-to-date potato sprayers have a special broadcast attachment for spraying weeds. These are excellent for large areas, as they cover a wide strip at each round. Care must be taken to see that every mustard plant is covered with the solution in the form of a fine spray.

Iron sulphate may be obtained at any hardware store or from the Nichols Chemical Co., Toronto. In wholesale lots it is better purchased from this company, who can supply

at much cheaper in large quantities than it can be purchased at local hardware stores.—Prof. J. E. Howitt, O. A. College, Guelph.

Selling Cream Pays.
Selling whole milk robs the young things on the farm—often the farmer's own children, of needed milk-supply, hence many farmers are content with less ready cash secured by selling cream in order to have better and more live-stock, and consequently richer soil, which, after all, is the basis of good farming.—Prof. H. H. Dean, O. A. College, Guelph.

A Safe Pill for Suffering Women.—The secluded life of women which permits of little healthful exercise, is a fruitful cause of derangements of the stomach and liver and is accountable for the pains and lassitude that so many of them experience. Parmelee's Vegetable Pills will correct irregularities of the digestive organs and restore health and vigor. The most delicate woman can use them with safety because their action, while effective, is mild and soothing.

THE WESTERN FAIR

September 6th to 13th
The management of the Exhibition, London Ontario, is to be congratulated on having secured for the Midway attraction this year the famous Johnny J. Jones Exposition which is, without doubt, the greatest array of all-star feature attractions that has ever been seen with any out-door Amusement enterprise. This Exposition includes about thirty shows and rides, all of which are of the very best quality. It will require over fifteen hundred feet of frontage to accommodate their shows. This will be something new and different from anything ever presented to Western Fair visitors. The platform attractions will be of a very high order, consisting of Horse Acts, Trained Elephants, Trained Dogs, Monkeys and other Animals, also some very high class platform acts, which will be announced later.
Prize lists, entry forms and all information regarding the Exhibition furnished on application to the Secretary, A. M. Hunt, General Offices, London, Ontario.

A SIMPLE METHOD TO REMEDY RHEUMATISM

AGE DOES NOT INTERFERE IF TREATMENT IS PROPERLY FOLLOWED

Many persons contend that there is no sure remedy for Rheumatism, Sciatica, Neuralgia, Lumbago, Neuritis, or their kindred diseases, but don't be biased: draw your own conclusions from the proof submitted.
Over two years ago, William Nesbitt, of 113 John St., Toronto, Ontario, was attacked by Rheumatism. Mr. Nesbitt was 53 years of age at the time and he feared the worst. After trying many remedies and prescriptions without obtaining relief he took a friend's advice and used Templeton's Rheumatic Capsules. Result—To-day Mr. Nesbitt says, "He hasn't lost a day's work since nor fears Rheumatism any more."
Mr. Nesbitt gives the entire credit for his recovery to T.R.C.S. Profit by his experience. Try them.
Sole Agents for Watford, J. W. McLaren, druggist, the Rexall Store, or if you live out of town mail \$1.04 to the above address or to Templeton's Limited, 142 King street west, Toronto, and capsules will be sent postpaid.

CHANTRY FARM

Do you want to increase your egg supply? Try a few utility Black Leghorn Eggs, only \$1.50 per 15; special rates for 100 or more. Hand-some, hardy and regular "egg machines." An ideal farm fowl. Or are you aiming at a good table fowl and winter layer? Try the Silver Grey Dorking. Cockerels 9 to 10 lbs. at 6 months. Can spare a few settings only.
