Vol. XI. HALIFAX, NOVA SCOTIA, AUGUST, 1899. No. 8.

## To Modify Caseine

so that it will correspond in constitution and digestibility to the soluble and diffusible albuminoids of mother's milk.

Take of

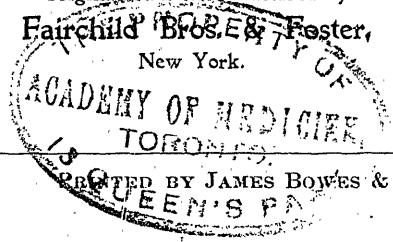

- Peptogenic Powder*, one measure;
- Cold water and fresh cold milk, each a half pint;
- Cream, four tablespoonfuls;
- Heat the mixture gradually bringing it to boiling point in ten minutes.

Result:

A "humanised milk" which in physiological, chemical and physical properties is almost identical with human milk.

### PEPTOGENIC MILK POWDER,

Originated and Manufactured by  
Fairchild Bros. & Foster,  
New York.

PRESENTED BY JAMES BOWES & SONS, 142 HOLLIS ST., HALIFAX.
