

B. Issues

1. Armstrong, M. The Canadian Economy and Its Problems. Scarborough, Ont., Prentice-Hall of Canada, 1970.

This book is concerned with contemporary economic problems and their solutions. It combines many of the basic tools of economic theory with historical and institutional material to give an introduction to the development and assessment of problems of economic policy in Canada.

2. Auld, D.A.L. (ed.) Economics: Contemporary Issues in Canada. Toronto and Montreal, Holt, Rinehart & Winston, 1972.

This collection was prepared with a view to illustrating that economics is an important aspect of much that is going on today in Canada. It offers a collection of articles, book chapters, government papers, and briefs that highlight the relevancy of economics. The future of Confederation, poverty, unemployment, inflation, urban problems, pollution, and foreign investment are some of the topical issues discussed.

3. Chant, J.F., et al. Canadian Perspectives in Economics. Don Mills, Ont., Collier-Macmillan Canada Ltd., 1972.

This is a collection of some 50 original papers, available either separately or in various combinations, covering virtually all major issue areas of economics in Canada. They are oriented towards the analysis of important, current economic and social policy issues, e.g., monetary, fiscal, and incomes policies; trade; public finance; industrial organization; transportation; and regional and urban problems.

4. Archer, M. Canada's Economic Problems and Policy. Macmillan, Toronto, 1975.

This is an examination of current, important issue areas in the Canadian economy; an overview of Canadian economic problems and an analysis of government policy instruments designed to deal with these problems.

5. Officer, L.H. and Smith, L.B. (eds.) Issues in Canadian Economics. Toronto, McGraw-Hill-Ryerson, 1974.

Twenty-nine original articles by leading Canadian economists that cover in an easily understandable way the historical and theoretical issues of their fields of specialization, the recent Canadian experience, and proposals for better government policy. A main theme is that government has become a pervasive feature in all facets of Canadian economic life and it is the hope of the editors that these articles will lead to greater public understanding of economic issues and improved government policy performance.
