Company/Product Information

For generations, T.S. Simms & Co. Limited has set high industry standards for design and craftsmanship in the manufacture of paint applicator products. Today, the Simms product line represents a wide range of items for the professional and the discriminating do-it-yourselfer. Every paint brush, roller coater, and painting accessory is made with the same attention to quality that has distinguished the Simms line for over 125 years. Simms' products are known for superior workability, quality construction, and technically advanced design. T.S. Simms is a fully integrated company engaged in research, design, and manufacturing from the ground up. The company combines sophisticated computer-aided design and manufacturing systems with the traditional skills of its craftspeople to make paint applicator products of the highest quality.

Simms' products are distinguished by colourful package design and bold graphics: packaging so effective that Simms' products sell themselves.

As the largest manufacturer of paint brushes and rollers in Canada, T.S. Simms has had a profound effect on the industry. Simms' state-of-the-art 175,000 square foot manufacturing facility is one of the most comprehensive in the industry.
