VEGETABLE PHYSIOLOGY.

The Chemistry of Vegetable and Animal Physiology. By Dr. G. T. Mulder, Professor of Chemistry in the University of Utrecht. Translated from the Dutch, by P. F. H. Fromberg ; with an Introduction, by Prof. J. F. W. Johnston. First authorized American Edition ; with notes and corrections, by B. Silliman, Jr. Part I., very neatly printed. Price 25 cents.

"In the true study of nature the principal aim ought to be, not only to make ourselves acquainted with the phenomena and laws which distinguish and regulate living and dead matter, but also to arrange those phenomena and laws, and exhibit them in their several relations. The more our knowledge of these two departments is extended, and the nearer the several parts of the great science of nature seem to approximate, the more firmly must we embrace the idea, as necessarily conformable to truth, that the same forces govern alike the animate and inanimate kingdoms."—*Author*.

"The celebrity of the author of this long-expected work, has raised a high degree of expectation among the readers in this department of scientific literature. For depth of argument and originality of views, he has surpassed all who have gone before him. The work is a profound one, and merits the careful study of all. We look forward with interest to the future numbers of the work."—*Tribune*.

"For extent and value of research, in the calm spirit of philosophic deduction which marks its peculiar character, and the absence of wild theory—it stands pre-eminent among the numerous profound and brilliant works of a kindred character, which the last two or three years have produced."—*Amer. Jour. of Science*.

WASHINGTON'S REVOLUTIONARY ORDERS.

Revolutionary Orders of General Washington, issued during the years 1778, '80, '81, and '82 ; selected from the Manuscripts of John Whiting, Lieutenant and Adjutant of the 2d Regiment of the Massachusetts Line, and edited by his son, Henry Whiting, Lieut. Col. U. S. Army. 1 vol. 8vo., well printed \$1 50.

This is a valuable publication—valuable as well from the historic interests of the orders, as from the source whence they emanated. The collection was made from manuscripts that had suffered from inattention, and the series may therefore be incomplete. Yet the papers, now for the first time published to the world, are of an exceedingly interesting character, particularly those dated from the camp at Valley Forge, during a most trying period of the Revolution. To the military man they are invaluable as specimens of clear and concise writing, and for the information they contain touching many questions of dubious interpretation under the code of war. To all they bring before the mind many of the scenes that made the name of Washington immortal, while they contributed to establish the liberty of this great Republic.
