

(b) In the event of two or more methods of timbering being used in one mine, then in addition to the notice posted at the mouth of the mine, a Notice shall be posted at the entrance to each section or district, stating the method of timbering to be used in such section or district of such mine.

(c) It shall be the duty of the miner in charge of a working place, which shall include such working place and for a distance of fifteen (15) feet back from the face, to keep the props, timber or other roof supports erected as designated in the "Notice of Systematic Timbering" governing the mine, Division or Sub-Division of such mine in which he is employed.

(d) Nothing in this Section shall prevent a miner from setting supports, or an Official from requiring the miner to set supports in his working place at more frequent intervals than those specified in the Notice aforesaid, where necessary for safety.

(e) Every miner in charge of a working place shall set sufficient sprags or other supports for the undermined coal, provided that before commencing to mine he shall set one (1) sprag or other support, and not less than one (1) for every six (6) feet of such undermining.

(f) Temporary props shall only be withdrawn by use of a dog and chain or other type of timber-drawing machine, unless permanent timber has been set before such withdrawal, and no permanent prop, timber or other roof support, shall be finally withdrawn without the use of such timber drawing device.
