

ALPHABETICAL INDEX.

(THE NUMBERS REFER TO THE PARAGRAPHS.)

Axis, details of.....	23
twist of, during revolution.....	63
tests of its motion.....	75, 76
level of, affected by counterpoise.....	77
end spring of.....	18
Asimuth, amount of its changes.....	80
causes.....	85
Circles, diameter and divisions.....	4, 21
casting of.....	21
how fastened to axis.....	20
perpendicularity of, to axis.....	78
laws of flexure of.....	61
table of flexure.....	62
Circle divisions. (See Divisions.).....	
Clamp, description of.....	22
Collimation error, changes of.....	81
depend on temperature.....	87
Collimators, description of.....	37
Y's of.....	38
may be set on each other.....	5, 24
differences and form of collars of.....	53
discrepancies of, due to refraction.....	64
recesses for placing.....	1
Counterpoises, action of.....	13
affect level.....	77
possible bad effect of, how tested.....	76
Cube, central, of axis.....	24
Design of the instrument, history and defects of.....	80
Divisions of circle, number and thickness.....	21
formulae for errors.....	50, 51
errors of, isolated.....	51-73
table for every 5°.....	60
1°.....	72
cyclical, inequality of.....	70
how tested.....	71
Errors, general precaution against.....	79
instrumental, table of instability of.....	81
Eye-piece, description of.....	25-28
Flexure.....	39
fundamental hypothesis in investigating.....	40
general theorem of.....	41
requisites for determining.....	42-45
of circle, special investigation of.....	60
observed laws of.....	61
table of.....	62
of telescope, general method.....	48
precautions in determining.....	49, 64
produced by sun cap.....	68
vertical, or cosine.....	48, 66
