If you carry a Jack on a Locomotive, why not carry one that will **Keep in Order**, and do the work *whenever required*?

The construction of the Norton Jack is such that it can be carried on Locomotives for months at a time, exposed to the coal-dirt and action of the weather, and be found ready for service when needed.

WE MAKE A SPECIALTY OF EQUIPPING LOCOMOTIVES with any special height or capacity required, at short notice.

Estimates furnished and Contracts Taken for Equipping Entire Lines.
