

DECLINE IN GRAIN PRICES

Weather conditions have caused a decline in grain prices. The close was lower for wheat, corn and oats. The decline was due to the fact that the weather was not so hot as it had been for some time, and the crops were not so well developed as they had been.

STOCKS ARE FIRM PAPER STOCKS ARE FIRM

Trading on the Standard Exchange yesterday had all the earmarks of strength, but the volume of business was still restrained. The price of silver was again in the ascending scale, and helpful to the market, at least, so far as retaining the strength of the Cobalts. About sixty thousand shares changed hands, but almost half of this was in the golds, and some 2-3 points. The buying in the market was certainly not on public orders, and no explanation was forthcoming to explain the demand. The market was held by the Cobalts, and Crown Reserve was firm. Most of the day's trading was in the golds, but here again there was very little change. Dome Extension and Dome were evidently more wanted than the others, and were trading at a premium. INVESTMENTS EASIER

Riordan Paper continued its ascent yesterday on the Canadian markets and made an addition of ten points to the previous day's price, with sales about \$25. The reorganization of the company is entirely acceptable from a market standpoint, and has drawn in considerable speculation. Little of the stock was dealt in at the Toronto market due chiefly to the fact that the holdings are largely tributary to Montreal. Atlantic Sugar made further gains. Other paper stocks maintained a strong undertone, and Spanish River continued to be popular. The investment securities were another strong issue, the common making an advance of eleven points from the previous night's close. In the other speculative issues the changes were less spectacular. Cement declined almost two points to 80, and Brazilian barely held its own. Twin City was higher at 81-1/2.

KIRKLAND LAKE GETS INTO STRIDE

Over Ten Mines Now Working at Top Speed in This Camp.

The Kirkland Lake camp is getting into its stride during the present year. Over ten properties are now working, and before another year passes several new producers will be added to the list. The shaft on the Kirkland Lake Mine, control of which is vested in the Beaver, is being driven to a depth of 915 feet. The mill is handling 100 tons per day and the ore averages about \$12. At the 400-foot level there is an ore shoot 15 feet wide by 300 feet long. The Lake Shore is sending a new three-compartment shaft to a depth of 800 feet. Stations are being cut every 200 feet. The Wright-Hargreaves is employing 55 men, and the suffering from a shortage of power, is making fair progress. The machinery for the mill is on the ground and construction is proceeding as rapidly as possible. The Beaver is sending a new three-compartment shaft to a depth of 800 feet.
