Wants More Information

Mr. Powell asked for some information from Mr. Marshall, superintendent of construction of the company, consisting of the streets in St. John on which telephone lines were operated, and the cost of materials entering into the installation of a telephone system. He thought this could be done in about two hours.

Counsel for the telephone company objected on the ground that a statement could not be prepared in so short a time and they wanted correct and careful figures or none at all.

Mr. Powell said if the company did not want to call Mr. Marshall, he would ask the commission to call him, as he wished to show that the estimate of \$400,000 as the value of the St. John plant submitted by H. P. Robinson, was grossly excessive. After considerable argument the commissioners ruled that Mr. Marshall should be called, provided the counsel for the company did not object at this time, and in case they did object, he could be called after they had closed their case.

Adjournment was made at 12 o'clock until 2.30 this afternoon.
