2.00 TANGIER GOLD MINES.

Woodstock, June 20th, 1861.

1,50 Tangier is about 55 miles from Halifax. The approach to it is through Ship Harbor and Charles River; but a separate entrance can be bad farther cast. In clear weather the navigation is easy, but if fogy or belsterous. It is both difficult and dangerous. A

1.00 and we were glad to learn that His Excellency Lord Mulgrave gave immediate directions to have the road continued to Tangier 1,50 so that every facility be given to the minets, and others going to and returning from the mines. If what we heard be correct, that 1,50 over one hundred claims have been taken out and paid for, it would be but a simple act of justice on the part of the Government to expend the whole of the sum realized for them (£500) on the en-1,00 the so as to afford good travelling to the public

expend the whole of the sum realized for them (£500) on the entire road, so as to afford good travelling to the public.
On reaching Tangier we were somewhat surprised at the busy aspect the place presented. Several schooners were in the harbor, from two of which lumber and timber for the erection of "shanties" were being landed. About forty or fifty rough boarded habitations have been erected along "Commercial" and "Gold" streets; and as each successive building goes up, it is being finished in better style, then preceeding enes.

as each successive building gees up, it is being finished in better style than preceeding ences.
Along the road we found two of the disciples of Tubal Cain with their forges busy at work ; and the resounding of the hammer 1,500 while employed in connection with the anvil, had a most pleasing effect upon the ear. Several of the "sons of St. Crispin" are also located at the "village" doing a good business ; and some carpenters too, are kept hard at work not only in putting up "shan-ties," but in naking oradles for the rocking of the quartz and sand.
On a minute inspection of the "diggings" or rather "blastings." —the number of which may be s-t down at over one hundred—we were really surprised to see the amount of labor performed, under the "claims," they being only 50 by 20 fe-t. It is estimated, without taking the quartz into account, that between 4 and 5,000 lbs.
