THE SEMI-WEEKLY T ELEGRAPH, ST. JOHN. N. B., JUNE 9, 1900.

# Seminary and Horton Acad-emy Students Farewell.

Wolfville, June 5 .- Apart from the apple biossoms, the silvery music of the feathered songsters and the ever-fascinating glories of a historic Evangeline landscape, perhaps the most daisy feature of the Acadia closing exercises is the reunion of the graduates and friends of Acadia Seminary.

This year Monday evening was the time for this delightful function. Mrs. Ralph Eaton, of Kentville, (in her pre-conjugal state she was Miss Alice Hanson '83) presided with the grace that becometh. A

paper was read for Mrs. Huldah Christie, of River Hebert, former student of Grand Pre Seminary (G. P. T. was the predecessor of and led up to Acadia Seminary) on Indus-trial Education. It was both weighty and

trial Education. It was both weighty and witty. Among other points she urged more teaching if household and everyday matters. The paper was well received. A poem both historic and prehistorical and in the Evangeline metre, setting forth the various developments of this beautiful region from the time when the lonely canoe croped the waters of Minäs flash unseen by any white face, through the period when the French Acadians dotted the uplands with their beautiful villages down to the present with its weakth of cultivated fields, the whole now crowned by institutions of learning, was read by Miss Grace Patriquin, '96, of Wolf-ville. It was heartly and deserve...y ap-plauded. It revealed the whole situation from an Acadia point of view most admir-ably.

The primary cause of indigestion or dys-pepsia is lack of vitality; the absence of nerve force; the loss of the life-sustaining elements in the blood. No organ own pro-perly perform its functions when the source of nutriment fails. When the stomach is robbed of the nutriment demanded by na-ture, assimilation censes, unnatural gases are generated and the entire system re-sponds to the discord. A practical illustration of the symptoms and torture of dyspepsia is furnished by the case of Mrs. A. Labonte, who lives in the village of Stadacona, Que. When inter-viewed by a reporter of the Quebec Tele-graph, Mrs. Labonte looked the picture of vigorous health, showing no traces of the malady that had made her life for the time miserable. Speaking of her illness, Mrs. Labonte said: "For about two years I sufand he wanted the sale postponed until such time as a protest from the Sydney such time as a protest from the Sydney board of trade and the town council against the removal of the hatchery had been received.
