FULL TEXT OF THE NOTE GOING TO KAISER TODAY

(Continued from page 1.) resigning on behalf of those under its care and authority. Only her actual resistance to capture, or refusal to stop when ordered to do so for the purpose of visit, could have afforded the commander of the submarine any justification for so much as putting the lives of those on board the ship in jeopardy. This principle the government of the United States understands the explicit instructions issued on Aug. 3, 1914, by the Imperial German admiralty to its commanders at sea to have recognized and embodied, as do the naval codes of all other nations, and upon it every traveler and seaman had a right to depend. It is upon this principle of humanity, as well as upon the law founded upon this principle, that the United States is happy to stand.

"The government of the United States is happy to observe that your excellency's note closes with the intimation that the Imperial German government is willing, now, as before, to accept the good offices of the United States in an attempt to come to an understanding with the government of Great Britain which the character and conditions of war upon the sea may be changed. The government of the United States would consider it a privilege thus to serve its friends and the world.

"It stands ready at any time to convey to either government any intimation or suggestion the other may be willing to have it convey, and cordially invites the Imperial German government to make use of its services in this way at its convenience. The whole world is concerned in anything that may bring about even a partial accommodation of interests, or in any way mitigate the terrors of the present distressing conflict.

"In the meantime, whatever arrangement may happily be made between the parties to the war, and whatever may be the opinion of the Imperial German government, have been the provocation or the circumstantial justification for the past acts of its commanders at sea, the government of the United States confidently looks to see the justice and humanity of the government of Germany vindicated in all cases where Americans have been wronged, or their rights as neutrals invaded.

"The government of the United States, therefore, very earnestly and very solemnly renews the representations of its note transmitted to the Imperial Government on the 15th of May, and relies in these representations upon the principles of humanity, the universally recognized understandings of international law, and the ancient friendship of the German nation.

REFUSES TO RECOGNIZE WAR ZONE. "The government of the United States cannot admit that the proclamation of a war zone from which neutral ships have been warned to keep away may be made to operate as in any degree an abbreviation of the rights either of American shipmasters or of American citizens, bound on lawful errands as passengers on merchant ships of belligerent nationality. It does not understand the Imperial German government to question these rights. It understands it, also, to accept as established beyond question the principle that the lives of non-combatants cannot lawfully or rightfully be put in jeopardy by the capture or destruction of an unresisting merchantman, and to recognize the obligation to take sufficient precaution to ascertain whether a suspected merchantman is, in fact, a belligerent nationality, or is, in fact, carrying contraband of war under a neutral flag. The government of the United States deems it reasonable to expect that the Imperial German government will adopt the measures necessary to put these principles into practice in respect of the safeguarding of American lives and American ships, and asks for assurances that this will be done.
