What Happens to the food you eat?

During digestion certain kinds of food containing proteins, such as meat, egg white, milk casein, wheat gluten, etc., are split into many different substances.

Some of these the body uses to rebuild damaged or dead tissues; some, however, are not only useless and harmful but in some cases actually poisonous. Regular, thorough bowel evacuation gets rid of the latter.

Constipation permits stagnation and absorption of these poisons into the blood, with injury to the whole body.

Taking castor oil, pills, salts, mineral waters, etc., in order to force the bowels to move does not—cannot cure con-stipation — but makes it

On the other hand Nujol overcomes constipation and brings about the habit of easy, thorough bowel evacuation at regular intervals, because Nujol is not a drug, does not act like any drug.

Nujol brings about a return to Nature's methods of sup-plying necessary lubrication of the bowel contents, by facilitating intestinal muscular action, by absorbing poisonous matter, and thus securing necessary cleansing of the intestinal canal and protection of the defensive properties of the blood itself.

Nujol has no deleterious after effects, produces no bad habits, makes the bowels regular as clockwork.

Nujol is efficient at any age -under any conditions-is satisfactory and safe.

How and Why Nujol overcomes constipation is de-scribed in an interesting and authoritative booklet, "Thirty Feet of Danger" free on request. Send for it and get a bottle of Nujol from your druggist today.

moon the delicious smell of the barbecued beef had brought everybody back to camp in keen anticipation of the great feast to come.

Just as Fatty announced that everything was ready for the battle, the shrill siren of a fast-coming launch proclaimed visitors. The jovial Roscoe swam out to where the launch had anchored and discovered D.W. Griffith and Mack Sennett who announced that they were just in time for dinner. During the barbecue the two producers jokingly told Arbuckle the beef was so good they had smelled it away over in Hollywood and their only worry hard corn, soft corn, or corn between the toes, and calluses, without on particle of pain, soreness or irritation. New Germany

It has been made known to the world at large, through the "Press," that there exists such a place as New Germany. Why the newspapers were so ready and willing to publish the adverse news and refused to print the truth is a mystery to us. The raid of the Military Police, which took 'place two weeks ago, was investigated by Inspector Dunean, from headquarters of the Military Police force of London. His report was a contradiction to the news of the raid, as it appeared in the newspapers the following day. This report of Inspector Dunean appeared in one of the daily papers, but it had a space on one of the back pages, and it was almost necessary to use a "reading glass" in order to find it. No other paper made mention of it except one, and that only, after it was requested by a very influential. THE MERCHANTS BANK

MeBain has been preaching a series f sermons on the "Way of Salvation" and has been explaining the fundamental doctrine f Christiantiy, such as repentance, faith, justification, and regeneration. Last night's subject was "Confession" The duty of confessing Christ was emphasized. We should acknowledge Christ for our contracts. There are faw things more own sake. There are few things more damaging to character than hiding our convictions. We should confes damaging to character than hiding our convictions. We should confess Christ t the sake of our example and influence on others and chiefly out of gratitude for what Christ has done for us. The fea of man restrains many from his duty, those who have the courage to openly avow Christ as Saviour and Lord will receive a blessing. If we honor him He will honor us.

A second purpose of advertising is to stabilize a business. The concern that goes to the wait at the first breath of hard times is the unknown or only locally known one. The one that weathers the storm is the one which enjoys a national or international eputation and draws from all out is for it business. Business is sald on equally had in every quarter at the same time.

Another purpose of advertising is to keep distributors in line. Out a vertising and your agent or dealer or salesman will drift away from you. The demands of war—to which you (esponded not only dutifully but eagerly—required that you divert you business from its regular channels. But they did not require that you give up your contact with your trade nor that you turn snob and cut your old friends dead. If you discontinue these business relations, how in the name of all that is logical can you expect your distributors to continue them?—From Marketing March.
