August.—We must once more in the interest of progress say it is a grand mistake to suppose that a good education is thrown away upon a farmer. If only farmers are content to jog along in the old way, as their fathers have done before them, it is pretty certain that they will always be able to make out a living, but we cannot hope that Canada will ever add much to the general stock of agricultural knowledge, unless we impart to our sons and daughters a higher education than has usually fallen to the lot of the Canadian farmer. He has as good reason to study Latin, Greek, and Mathematics as any body else. Why not?
