FEBERAL GOVERNMENT LOAN

Only Small Proportion Has Been Taken by Public, but Balance will be Absorbed by Genuine Investors Within Sixty Days---Dominion has Successfully Placed Four Big Loans in Last Nine Months

London cables announce that of the inderwriters by the Bank of Montrea et in 25,000,000 new Dominion Government and 12 per cent. has been subscribed of the public. In consequence, the public is consequence, the inderwriters of such loans, but they £5,000,000 new Dominion Government loan 12 per cent, has been subscribed by the public. In consequence, the balance of £4,400,000 is left with the underwrite.

underwriters.

It should be pointed out, however, that the entire loan had been successfully underwritten by some of the most powerful financial houses in London, and the Dominion Government of Canada, before the offering on behalf of the underwriters, had absolutely secured the £5,000,000 they had set out to borrow.

to borrow.

This is a point that is not always kept in mind in Canada, but is well known in London; and, in a case of a loan, like that of the Dominion Government of Canada, many underwriting a portion of the loan as a permanent investment.

As Permanent Investments.

It is also the practise for the great Clearings Banks of London to underwrite only such loans as Dominion Government, for instance, because they are favorably regarded by them as a permanent investment, so that when the balance unsubscribed by the public is left on their hands they are quits satisfied. These should be regarded as firm underwritings but no account

andetwriters of such loans, but they are in a different category, for when hey have been left with underwriting is in this case, they merely held for he purpose of re-selling to the investor as he comes along.

An Undoubted Security

In the ordinary course of things it can be confidently expected in the case of such a popular and undoubted ecurity as that of the Government of he Dominion of Canada that' even uch a considerable percentage as Ser cent. unsubscribed will be absorbed ye genuine investors within say 60 yays.

b less than 33 Colonial Governmental blic issues have been made in L on and only 6 of these have builty subscribed for by the public

Question Asked Respecting Action of Canners and Nova Scotia Steel BEAR RAID THEORY

Street is Discussing Whether Nova Scotia Didivend Will Be Cut to 4 Per Cent. or Cut Altogether.

ention has been drawn during the past week are Dominion Canners and Nova Scotia Steel and Coal, write Messrs. hornton Davidson and Co., in a letter clients.

Dominion Canners was the first to show a marked decline. There being hat the dividend was in danger. The market again showed its capa

ty for judging of coming events. The stock, though on a 6 per cent, divi-dend basis, was in the vicinity of 32 then the directors met and passed the lividend.

The Street has been asking how it ame about that there was so much selling previous to the meeting and the ablic announcement of its decision, and whether there were well-informed people or simply good guessers.

Weakness of Scotia.

car raids, based upon the condition a the iron and steel trades, but this neory, good as it may have been dur-ing the early days of the selling, does to find many supporters after the re-ent heavy liquidation.

Instead, the Street is discussing hether the dividend will be cut to 4 er cent, or passed altogether, or whe-her the weakness presages new fin-leting.

Margin Over Dividends.

Margin Over Dividends.

Scotia did not show a very heavy nargin over dividends last year but he margin was safe énough.

After all appropriations had been nade, presumably in a liberal manifer, the balance applicable to commor stock dividends was 7½ per cent.

As 6 per cent, was paid in dividends he remainder of 1½ per cent, was udded to the previous profit and loss, naking a total of 8.08 per cent, to carry forward.

naking a total or sos per convolution forward.
This, if in liquid form, would be exallable for dividends if the directors considered it advisable to distribute in this manner.

Faces New Responsibilities.

As against this is now the statemen hat the company, through its ownership of the Eastern Car Company, it teing responsibilities which in the past ild not have to be counted on and that secause of this, new financing will ave to be undertaken.

The whole matter, however, is little more than guesswork wave that the nore than guesswork wave that the

iy, Officials of the company have beer disting the west lately, and some think hey may have something to communi-ate to shareholders before their re-urn to Nova Scotia.

HEAVY LOSSES IN LUMBER BUSINESS

Mr. C. F. Johnston, the president of he British Canadian Lumber Corpor-tion, Limited, says that the heavy osses experienced during the past year are due to the unfavorable conditions ire due to the unfavorable conditions which have prevailed in the Western umber trade in 1912 and which did no mprove in the succeeding year. Here is the statement of the company:—Loss of operations for the year 1913 before charging interest. Sect. 471

GROSS DECLINES

st Important Halt in Company's Earnings for Several Years Due to General Business Situation. Gordon Process Will Be Used in Making White Product—D. A. Gordon President of Company.

New York, June 11.—Western Union gross forms one of the best baromsters of the course of general business in this country. It is very important, herefore, to note now that for the first four months of this year, the period anded April 20, gross income of the country's largest telegraph system showed a comparative decline of 1½ per cent, or at the rate of a comparative loss of \$750,000 per annum. Coming on top of 10 per cent to 18 per cent expansions per month during 1912 and 1913 this decrease is perhaps not to be wondered at. At the same time is the first important half there has been in the upward course of Western. Union gross in several years and its masse must be found entirely in the general business situation. New York, June 11.-Western Union

ceneral business situation.

However, the trend of earnings has been turning and it is understood that reliminary figures for May promise a gain in the gross receipts for that month of about 9 per cent. Undoubtedly the cold, backward spring checked a large volume of sensonal-buying which was not released until last month.

It will be received.

CANADIAN INTERESTS IN SUGAR REFINING

New Orleans, Juhe 11.—The Canadian-American Sugar Refining Company, which is made up largely of Canadian interests and capitalized at \$1.000,000, has acquired the sugar refining plants at Kenelworth and will shortly begin operations by installing what is called the Gordon Process, in the making of white sugar.

the making of white sugar.

The Kenelworth plantation will continue to be controlled by an English syndicate, the interests of which are represented by Samuel Gibbs, of London. Among those interested in the Can-Allong those interested in the Cardian-American corporation are: D. A. Gordon, who will be president, and whose process for the making of white sugar will be used; Denis P. Burguiers, T. J. Lipscomb, R. E. Gordon, L. A. P. Parr, M. H. Hazelden and Samuel Gibbs.

VOL. XXIX. NO. 31

Summer Dry Goods in Mu Better Demand---Sample for 1915 Being Received

WOOL MARKETS BETTE

Prices Being Paid, Averaging 2 3 cents a Pound over Last Year

The past week has shown a marke improvement in the man the following and worsteds, due principally the warmer weather prevailing an the fact that merchants and retailer are finding themselves short or many lines of stady's summer goods, sit the repeat business has been big stocks in these light goods are no large as placing orders were considerably curtailled. The mid-seasor stock-taking among the wholesule houses was satisfactory in most cuses especially among those whose business is confined to Quebec and the Martimer Provinces, one firm doing business in that quarter entirely reports an increase of 10 per cent, in sales for the half year over the same period last year. Smal repeat orders for fall goods are still being placed by the jobbers, but this trade is very slow, and the volume of orders placed show a large ens and worsteds, due principally t volume of orders placed show a large curtailment. Stocks of fall and win-ter goods are heavy all over the coun-

1915 Samples Arriving.

1915 Samples Arriving.

There is little improvement in jobbing circles in the West, and reports from various jobbers there are rather gloomy. Orders were placed very cautiously as stocks in most lines are ingo only orders were placed very cautiously as stocks in most lines are ingo owing chiefly to the fact that some rather reckless buying was engaged in by the Western jobbers when things were booming. At present these houses are only buying from hand to mootfi, and in many cases where orders were placed at the proper time they are now being held by the mills awaiting shipping instructions. waiting shipping instruction

Agents are now showing car Agents are now showing samples 101 Spring, 1915, and so far appear fairly well satisfied with the results they have had. They are finding stocks low weight satisfied with the results they have had. They are finding stocks low and anticipate a quite average season. In piece goods, browns and greys, striped patterns are the prominent styles for men's wear, but so far the clothing houses and fobbers have been holding off. Prices are slightly advanced on most lines, and further advances will in all probability be made by the mills before the season is much older. Repeats in fall and winter goods are still coming in in fair volume, mostly small, but in other cases cancellations of previous placing orders are also coming in. This season the mills have been more insistent and have refused to accept these cancellations.

Clothing Factories Busy.

Clething Factories Busy.

Most of the clothing factories are now running in several cases to full cipacity, but this is not the general rule by any means, although this is, the season when they should be the busiest. The past week or so has been more satisfactory and orders have been coming in more freely, but the season's business will show a marked decrease over previous years. Ontario and the West show the largest falling off, a number of the houses not sending their travellers west of "Winnipes, as business did not warrant it.

Conditions among the mills show little improvement The sweater mills are very slack, and agents' reports do not anticipate any improvement. This section of the trade is suffering from over-production in this country, with the result that prices have been cut to a very low level. Men's sweaters are had agent as good demand as in former years, but ladies' coats and other lines have been cut into by other styles. The bianket mills are fairly busy, especially on the higher grades. The hosiery mills are busy, as also those on the cheaper grades of heavy wool underwear, but prices are close. The piece goods mills are sairly busy, as also the several for the next month or so. Short time is general in this section of the industry, as also among those mills on other lines of knit-gods.

THE WOOL MARKET.

During the past few weeks the new definition of the lights been coming forward in good leading. The Ontario cilp is in fair out in the output in the work of the leading the light of the l ent in the manner in which the wood are put up and marketed. Top prices are being paid, averaging from 2 to 3 to 26½ and are holding firm at these figures.

No great trade, however, has passed warrant the purchase of large stocks of the raw material at the present time. Reports of the present time. Reports of the present time. The present in woollen manufacturing makers.

Dealers state that the present time. The present in woollen manufacturing makers others.

Dealers state that they have no difficulty in disposing of their stocks to firm all American buyers and anticipate that prices will hold very firm for some working time. The following prices prevail. Unwashed coarse, 17½ to 18½c; do., ai.
