

## Caught a Cold Which Ended in a Severe Attack of Pneumonia.

Too much stress cannot be laid on the fact that when a person catches cold it must be attended to immediately, or serious results are liable to follow.

Bronchitis, Pneumonia and Consumption are all caused by neglecting to cure the simple cold.

Mrs. G. W. Bowman, Pattullo, Ont., writes: "Three years ago I caught a cold which ended in a severe attack of Pneumonia. Since that time at the beginning of each winter I seem to catch cold very easily. I have been so lame I was unable to speak loud enough to be heard across the room. Last winter, however, a friend advised me to try Dr. Wood's Norway Pine Syrup, saying it had helped her. I bought a bottle and before it was half used I was completely cured. I also find it a good medicine for the children when they have colds."

Beware of the many imitations of Dr. Wood's Norway Pine Syrup.

Ask for "Dr. Wood's" and insist on getting what you ask for.

It is put up in a yellow wrapper; these pins from the trade mark; the price, 25 cents. Manufactured only by The T. Wilburn Co., Limited, Toronto, Ont.

When a bit of sunshine hits ye,  
After passing of a cloud,  
When a fit of laughter gits ye,  
An' ye'r spine is feelin' proud,  
Don't forget to up and fling it  
At a soul that's feelin' blue,  
For the minute that ye sling it  
It's a boomerang to you.

Smile  
Awhile,  
And while you smile  
Another  
Smiles,  
And soon there's smiles  
And miles  
Of smiles,  
And life's worth while  
Because you  
Smile!

## QUESTIONS AND ANSWERS. Miscellaneous.

### ROCKET.

Enclosed find a weed which I got in alfalfa seed. Could you tell me, through your paper, what it is, if it is a bad weed, etc? D. J.

Ans.—The weed is rocket (*Eruca sativa*). It has been introduced into Ontario with European alfalfa seed. It is an annual plant of the mustard family, and should be hand-pulled to prevent seeding. If too thick to pull, cut the alfalfa before the rocket matures seed. Care should be taken not to sow seed containing this weed.

### OESTRUM ABSENT.

I have a mare that had a colt this spring, and she will not take the horse, as she does not come in heat. What medicine am I to give in order to produce oestrus? A. B.

Ans.—Animals usually show their strongest sexual desire when gaining in flesh. If the mare is in good condition, reduce her feed for a time, and then feed her up again, taking care not to work her too heavily. A laxative diet is advisable, nothing being better than grass. Liberal feeding, with regular, moderate exercise, is about all you can do.

### SPRAY FOR MUSTARD.

I saw in your paper some time ago, a formula for killing cadlock in grain by spraying with something. I can't find it now. If you could give us reprint we will take better care of it. C. M. C.

Ans.—Spray at the rate of about 50 gallons per acre, with a solution of blue-stone or copper sulphate, of a strength of about 2 lbs. in 10 gallons of water. Iron sulphate is even more effective than the copper sulphate, but is not quite so handy to use, and by reason of the great quantity required is more expensive. It may be used at the rate of 80 lbs. to 40 gallons of water. Apply on a bright sunny day when the mustard plants are just about to come in bloom.

### JOINT ILL.

Colt, now twenty-six days old, when a few days old puffed at knees; at four days the navel became moist and will not heal. Could you give cause and remedy? I. R.

Ans.—From the description given, this is a case of joint ill or navel ill. Prevention is better than cure for this, as the disease is caused by a germ which enters the colt's system through the navel. The navel should be dressed as soon as possible after birth, and four or five times daily afterwards until healed, with a ten-per-cent. solution of carbolic acid or formaldehyde, or a solution of corrosive sublimate, 15 grains in 8 ounces of water. Treatment of the disease when it is once established is seldom successful. Hot poultices may be applied to the joints, and they can be well rubbed three times daily with camphorated liniment. Give the colt 5 grains iodide of potassium three times daily in a little of the dam's milk. Keep the colt quiet and comfortable, and give the mare 1 dram of potassium iodide three times daily.

### DUTY ON SECOND-HAND MACHINERY.

Is there any duty on second-hand machinery from the United States into Canada, or from Canada into the United States? SUBSCRIBER.

Ans.—Under the Customs tariff of Canada, second-hand machinery is subject to the usual requirements of the tariff as to duty. The value for duty purposes is represented by the fair market value of the machinery in condition as imported. There is no provision in the United States Tariff Act of August 5, 1909, for the free entry of second-hand machinery into that country. Such machinery is assessed with duty at the same rate as would be imposed upon new machinery of like character. As the value, however, of the second-hand machinery would be, presumably, less, the amount of duty collected thereon would be less than that collected upon new machinery. Machinery not otherwise provided for, is assessed with duty at the rate of 15 per cent. ad valorem, under paragraph 199 of the Tariff Act, which paragraph provides that rate of duty upon articles composed wholly or in part of metal.
