

**Do You Know**

that smut treatment should be carried out as thoroughly as preparing the land, because if you don't eradicate "smut" it will eat a big hole in your profits?

If not looked after "smut" increases to an alarming degree and your crop will be almost a dead loss. Bluestone and chemicals are effective in controlling "smut" but you may injure the seed unless very careful—then again bluestone is deadly poison. Birds, vermin and grubs will not touch seed treated with Corvusine, still at the same time it is quite harmless. The best and surest cure for "smut" is Corvusine D.G. which not only eradicates the disease but assists in germination and protects the seed against all harm. Corvusine is easy to apply and does not clog the drill.

Farmers in England and Europe have proved the worth of Corvusine and we will be pleased to forward you copies of their testimony with our booklet. Write us at once.
