Oil Cooled Gasolene Engines

DON'T FREEZE! In exceedingly cold climates where it is impossible to use water for cooling Gasolene Engines, FAIRBANKS-MORSE Oil Cooling device solves the problem.

Fairbanks-Morse Oil Cooled Engines cannot freeze up in the coldest weather.

The Oil Cooling attachment takes up less space than a water tank and does away with water altogether. Write us to-day for full particulars.

Fairbanks-Morse Engines are made in Canada and specified by the Canadian Government. There are more of our engines in use than any other make.

Start Your Crops Right By Proper Seeding

NOW is the time to begin thinking about the production of Bumper Crops for 1907.

The time to start such crops is when you prepare the seed bed.

Nothing is more important than having the ground in right condition and the seed properly planted.

You take no chances with the McCormick line of machines and implements. In their long and successful history they have been perfected to meet every condition.

McCormick tillage implements are peculiarly fitted to meet the requirements of crop growing in Western Canada, and fulfil the demands of farmers in this region where proved superiority is wanted.

The McCormick line of drills includes Disk Drills, Hoe Drills and Shoe Drills.

Simple but effective safety devices are provided to prevent breaking in passing over roots and stones.

Hoe Drills may be quickly changed to Broadcast Seeders. Shoe Drills are especially adapted to loamy soils, and being driven from both wheels, an even flow of seed is made certain at all times. The Cultivator and Seeder is easily changed from one to the other.

The McCormick Disk Drill, herewith illustrated, is especially adapted for drilling stubble or trashy land. The spaces between the disks are wide enough to prevent the drill from choking or clogging. Just the drill for seeding on fresh breaking or sod plowing. Cuts up the earth and makes a fine seed bed. Made in three sizes: 15, 17, 19 disks.

McCormick Inthrow and Outthrow Harrows work the most stubborn piece of ground into condition. The disks are made of special

tempered steel, and can be set at any angle by means of the levers. There is no side draft. No matter what difficulties the soil presents, this harrow will work perfectly.

McCormick Smoothing Harrows have the greatest strength and durability possible. Frames and tooth-bars are channel steel. The upper ends of the steel teeth are threaded and bolted to the frame which is rigidly clamped together.

These harrows can be supplied in two, three, four, five or six sections.

The McCormick line is complete, and includes, in addition to the above, Spring-Tooth Harrows, Scufflers and Land Rollers.

Call on the International Local Agent or write nearest Branch House for Catalog.
