BONDED

LICENSED

## NOTHING SUCCEEDS LIKE SUCCESS

**WHY ARE OUR RECEIPTS OF GRAIN INCREASING so rapidly?--We are practically doubling our business every succeeding year, and our receipts are still on the increase; what does it all mean?**

We have our own sampling and grading experts to check the Government grading of all cars Consigned To Us.

We have a Claims Department to protect your interests against the railroads and other concerns.

We handle the volume of business and by being able to sell large lots of grain we can often secure prices considerably above market quotations.

We are all grain growers and our interests are your interests. All that remains as profits from the charge of handling the grain goes back to the farmer.

Ship Us a Car and You Will See.

### Have You a Share In

**Our Company?** This is a Farmers' Co-Operative Company and we want to have all the Farmers with us in this Movement. NOW is the best time of the year to purchase Stock. All money received on Stock before April 30th will bear dividends from the whole business year, ending June 30th. Write for fuller particulars at once or send in your application.

**The Farmers' Headquarters** When you are in the City don't fail to call at our office. After April 1st we shall have moved from our old offices, 445 Main Street, to the Keewayden Block on Portage Avenue, East. You are always welcome and we will be pleased to give you any information you require concerning the markets or the grain trade in general. Make use of Your Own Company; that is what we are here for.
