THE GIRLS OF KASHMIR.

Why They Are Not as Beautiful as They Once Were.

The girls of Kashmir in former times were so beautiful and so pure that the Punjab, in India, they commanded a large price, and parents in moderate circumstances for centuries past have been in the habit of parting with their daughters to place themselves in easier circumstances, and the daughters have generally been quite willing to escape from a life of penury and labor to one of opulence and ease.

A laboring man in this part of India cannot earn over \$2 or \$3 a month, while many receive for their daughters as high as \$1,000. There are some cases where \$5,000 was paid, but the usual price has been from \$100 to \$500.

The practice became so common as well as so damaging that a severe law was enacted prohibiting any one from removing any woman from the country, but it is said that the business goes on now as it has done for hundreds of years, and to that practice may be charged the fact that the women of Kashmir are not as beautiful as they once were.

The process of taking all the beautiful girls away, leaving only the "old" and "ugly" ones to continue the race, has lowered the standard of beauty. Most of the women and girls perform field labor as much as the men, and their dress is of the coarsest and plainest materials, consisting of a garment like a nightgown made of white cotton. There is no effort to have it fit.

The condition of women in Kashmir is a very sad one, but one from which there does not seem to be any present escape. It is a constant struggle to live, without the least hope of any accumulation or of ever seeing better days. The men only receive about 5 cents a day and the women generally about 3 cents, and that provide only the coarsest food.

PICKINGS FROM FICTION.

There is nothing that is enough for a woman, but all—"The Mississippi Bubble."

Overdone heartiness is nearly as nasty as underdone mutton—"Comments of a Countess."

No man can be brave who considers pain the chief evil of life—"The Heroine of the Strait."

We ought never to do wrong when people are looking—"A Double Barreled Detective Story."

Occasion's everything, but the rub is to know an occasion when you see it—"The Lady Paramount."

I'd be slow in advising anybody to crook, but when you feel you're in the hands of sharpers it's the only way—"Rockaway."

The master poets love to deal with the victory of the vanquished, which the world's thinkers know to be greater than the victory of the victor—"Nathan Hale."

Be sure, before you give your love and your trust, that you are giving them not only to one who deserves them, but to one who really wants them.

Useful Purposes of Rosin.

There are many useful purposes to which rosin can be applied outside of those of general practice. As a non-conductor of heat it is used in the protection of water pipes, particularly in crossing bridges, where the pipe is laid in the middle of a long box and the whole filled with melted rosin. Rosin is also used in supporting basement floors in machine shops, which may be laid over some dry material, as spent molding sand, which is carefully leveled off, and the planking laid upon temporary supports separating it about two inches above the sand.

Numerous holes about two inches in diameter being bored through these planks, melted rosin is forced through them by means of funnels until the whole space is solidly filled, and then the upper flooring is laid upon these planks. In case the floor is subjected to shocks sufficient to break the rosin it rapidly joins together again in much the same manner as the regulation of ice.

The Dragon Slayer.

At an English school a pompous younger whose father, it was well known, had been a successful omnibus driver was one day fingering ostentatiously a large seal which he is in the habit of wearing, representing St. George and the dragon, and, having drawn the attention of a school companion to it, remarked carelessly:

"Ah, one of my ancestors is supposed to have killed the dragon, don't you know?"

"Good gracious!" inquired the other, somewhat anxiously, "Did he run over it?"

Slowly Dying From Catarrh

Thousands are in this terrible condition but don't realize their danger. If you have the slightest taint of Catarrh, would it not be wise to commence Catarrh treatment now and be perfectly cured in a short time? This pleasant remedy cures without the use of drugs, atomizers or snuffs. You inhale the medicated vapor which spreads to all parts of the breathing organs, kills the germs and heals the inflamed surfaces. Catarrh cures the throat and nose instantly, and never fails to cure the most obstinate catarrh, lung and throat troubles. A trial will demonstrate the value of Catarrh, which sells for \$1, small size 25c., at Druggists or Folson & Co.

Sandwich Islands.

The term "Sandwich Islands" recurs in news items, scientific addresses and in lectures with a frequency which suggests some other cause than ignorance of the fact that the early name of the group has long been obsolete. One cause of this survival, especially where these islands are mentioned in public speech, is the inability of the mainlanders to pronounce "Hawaii." He usually says "Haywaylan" and knows that he is wrong; so to protect himself from a lingual infelicity he says "Sandwich Islands" and lets them go at that.

Beauty is born in the blood. Beauty is more than "skin deep," it is blood deep. When the blood is tainted by disease the flesh will feel it and the skin will show it. Sallow or muddy complexion, pimples, blotches, and eruptions are only the surface signs of impure blood. Face washes, lotions, complexion powders, may palliate the evils but they cannot cure the disease. The only cure is to cleanse the blood of the poisonous matter which is the cause of the outbreak in the flesh and skin. Impure blood can be absolutely purified by the use of Dr. Pierce's Golden Medical Discovery. Its effect on flesh and skin is marked. Sores heal and disappear. The skin becomes smooth, and regains its natural color. The eyes brighten and sparkle, the whole body is radiant with the brightness and beauty of health. "Golden Medical Discovery" contains no alcohol, whiskey or other intoxicant, and is absolutely free from opium, cocaine and other narcotics. The use of Dr. Pierce's Pleasant Pellets assists the action of the "Discovery," by cleansing the system of clogging matter.

The Penpackers.

There are not many Penpackers in the state of Pennsylvania, and the name of the Philadelphia jurist who has been nominated for governor has aroused considerable discussion. There is only one Penpacker family in Pittsburgh and one in Allegheny. Allegheny has a Panabaker. That is really the nearest thing in the directory to Penpacker, for Penpacker originally is no suggestion of coin about it and is a corruption from the old Dutch or Pennsylvania German Panabacker, or Panabaker, which merely means a man who bakes in a pan.

The Cause of Nervous Headache.

This most distressing and common malady doubtless has its origin in some unbalanced condition of the nervous system. Probably the simplest, safest and most efficient remedy is Polson's Nervine. Twenty drops in sweetened water gives immediate relief, and this treatment should be supplemented by bathing the region of the head with Nervine. To say it acts quickly fails to express the result. Sold everywhere in large 25c. bottles.

Giving Her Light to Die.

A small farmer, Abernethyshire, having a wife that had been long ailing and confined to bed, was of so negatively a disposition that he grudgingly the poor woman so much as a light. She in a pet one night exclaimed, "Oh, I wish this an' one thing that a 'pob' body 'll nae get light to see to die." The husband rises up and lights a candle and, placing it at the bed foot, says to his wife, "There, dee hoo!"

POWERFUL MECHANISM.

The Picking Up Machine Used in Grappling Ocean Cables.

A truly wonderful piece of mechanism is the "picking up" machine used in all grappling and cable hoisting operations. It is a powerful variety of the steam winch family, but also a most aristocratic and elaborate member, fitted with gear changing clutches, patent brakes and other ingenious appliances. To give some idea of its capabilities in dry figures it can at slow speed lift twenty-five tons at the rate of one mile an hour or at fast speed ten tons at the rate of four miles an hour. Moreover, it can be quickly altered and adapted to changing circumstances in speed or lifting weight.

All being made ready, the big grapple, attached to 700 or 800 fathoms of chain and rope, is passed over the bow sheave, or pulley, and as soon as it reaches bottom the ship is sent slowly ahead. Back and forward across the path of the cable, as pointed out by the friendly marking buoys, we steam. Several times the grapple catches something, only to lose it hold again, probably an inequality upon the bottom, although a bosun's mate mumbles "mermaids' grottoes," but at last comes a steady strain. Every soul on board hangs over the bow, watching the grimy grapple rope come steadily up and over the well oiled pulley. At length the grapple itself appears, holding tight on to the truant.

May Day Custom in Belgium.

The most honored month of the year in Belgium is the month of May, known as the Virgin's month and consecrated to the Virgin Mary. In the province of Liege young maidens have a quaint way of predicting their love affairs this month. A group of girls arrange to meet at sunrise and start to walk through the fields until they come to a hedge, quite unobserved from the highway, where they generally choose a honeysuckle bush beneath the protecting branches of which to perform their mystic operations. Each maiden selects three blades of dew laden grass, the tops of which she cuts to equal length and to each of which she attaches a colored silken thread. Black represents a bachelor, red an unknown lover and green the secret desires of the maiden's heart. Ten days afterward they return to the same spot where they left the blades growing, and that blade of the three chosen which has surpassed the others in height reveals the lover the maiden is destined to have.

The Old Way of Passing Bills.

A document found among the Duke of Rutland's papers at Belvoir castle throws a curious light upon the mode of getting private bills through the house of commons in the days of King Charles II. The case in hand was the divorce bill of John, Lord de Roos, an affair that caused a great deal of gossip in its day. One of his lordship's agents wrote in January, 1697: "On Wednesday last I got six and forty of the house of commons to the Dog tavern, in the palace yard at Westminster, when were present Mr. Attorney General and Mr. George Montagu. As soon as they had dined we carried them all to the house of commons, and they passed the bill, as the committee, without any amendments, and ordered it to be reported the next day."

Shakes That Were Shakes.

Over on the eastern shore of Maryland there was a man who was suffering from a severe case of "shakes," as they call fever and ague in that country. One morning the local physician called on the patient and asked him how he felt.

"N-n—not a bit b-b-better," was the shaking man's reply.

"Your case is a very peculiar one and hard to take hold of," remarked the doctor sympathetically.

"Yes, that's so," remarked the patient, trying to smile. "The c-case sh-sh-shakes so I don't w-wonder you c-c-can't get hold of it."

Their Words Struck.

When Mark Twain was in Egypt, he one day arranged with a friend to meet him at one of the pyramids. The latter engaged two old but experienced Arabs to guide him to the place. He afterward complained that, although he had some knowledge of their native language, he could not understand anything that his guides had said to him.

"You should have hired younger men," Mr. Clemens told him. "These toothless old fellows talk only gum Arabic."

Captured.

Mabel—I suppose you have heard of sister Lou's marriage. She's taken a flat in Kensington.

The Pleasantest Route to Ruin.

"Prosperity has ruined many a man."

"No doubt, but if I'm given any choice in the matter I'd rather be ruined by prosperity than by adversity. The process is more enjoyable."

Stationary.

"There's no progress about him."

"No? But he's still doing business at the old stand, isn't he?"

"Say, rather, he is doing business at the old stand still."

His Title.

"If it were customary in this country to confer titles upon men who go in for literature, what would I be?" asked a reconciled journalist of his senior.

"Baron of Ideas," was the terse reply.

THE TORTURE OF NEW SHOES

A North West Lady Tells how "Foot Elm" Gave her Relief and Comfort.

It is difficult to get a pair of new shoes that fit the feet perfectly at the outset. Most times they pinch and squeeze the foot, and cause great discomfort until they are "broken in." "Foot Elm" shaken in new shoes makes them fit as comfortably as an old pair, prevents the "drawing" of new leather, and prolongs the life of the shoe.

Here is the experience of Mrs. Francis M. Norris, Nanton, Alta., N. W. T.

"I have for years suffered with tender feet and it has been perfect torture to wear a pair of new shoes, no matter how soft or easy. I am glad to say 'Foot Elm' has given me relief and is a very valuable remedy for tired feet."

"Foot Elm" is 25 cents a box of 18 powders at all druggists or by mail. Stott & Jury, Bowmanville, Ont.
