The minus sign thus—at the left hand, de-notes below zero, its absence lenotes above

The column for Minimum Thermometer shows the lowest temperature for every day.

Agricultural.

The Best Cattle to Rear.

AN OLD COUNTRY BUTCHER ON CAN-ADIAN BEEF. The Guelph Mercury has been handed the following extract from a letter from Mr. Alexander Johnston, a leading butcher in Edinburgh, to Mr. James Miller, butcher of Guelph, in which he gives his opinion on the years: earliest fed and best for sale are what and well cultivated, produced more ates. we want. In the Shorthorn of the right sort when crossed with either same amount of labor used on one. Devon or Hereford, you have all that 2. One cow, horse, mule, sheep or is wanted. But you cannot attain hog, well fed, is more profitable than this by crossing with the Galloway. two kept on the same amount neces-I look upon the Galloway as the sary to keep one well. ways a deal of coarse beef about him. no grass or clover is raised. The Shorthorns with Galloways make a good cross for farmer and butcher, but the best cross we have is Shorthorns with Aberdeen Polled (as a from his door in the end. class) both for farmer and butcher. They surpass the Galoways as much as the Shorthorns surpasses all other breeds, and at all times command the highest price as dead meat in fences, and complains of bad "sea-London. A very great trade is car-

surprised that they fetch high prices, for they really deserve it. With regard to sheep the breed I would beverage is cold water, is healthier, commend is Cheviot, but I am wealthier and wiser than he who does afraid your country is not adapted not refuse to drink. to their roving habits, as they are

Deferred Matter.

The Proof of the Pudding.

The National Policy has now been

somewhat of the nature of the blackfaced sheep and require room. But where little fat is required compared with flesh, I would say the Southdown is the best for fine mutton. Still, I think the Cheviot is worth a trial. When you want more flesh than fat the sheep most in use with farmer and butcher."

The Value of One Improve Animal.

In Mr. Bonner's barn we noticed a good Shorthorn bull, two years and what do we find?

In Mr. Bonner's barn we noticed our memory. Well, as we have said, here it has been in operation for near-ly two years and what do we find? old last spring, thoroughbred, registered, that cost \$150, we believe. He was kept for the double purpose of improving the stock of the farm and of the neighborhood as well, and behind it. At the present time every and of the neighborhood as well, and for the latter purpose was let at the low rate of \$2 per service. His progeny for the present year will number at least 60, yielding say \$120, though a considerable number of these will be in the home herd. A little figuring will show the value of a single such animal. The calves will be worth \$8 to \$18 each at one day old. while the ordinary "natives" sell for only \$1 each. Call the increased value only \$5 each, a the increased value only \$5 each, a very low estimate, and the increased value of the 60 calves vill be \$300 being manufactured to order, and or twice the cost of the bull. But look ahead a tittle: The expense of raising 60 saimals to three years old will be about the same for natives or good grades; but atthat age age is for our contemporaries to purpose of heing one of the richs. tives or good grades; but at that age ers is for our contemporaries to pub gives promise of being one of the richthe improved animals will sell for at least \$25 more per head—equivalent for the 60 animals of this one year's get to, at least, \$1,500. Let it be kept in mind that this result will surely come from keeping this west each letters and know the men among those interested in gold mining.

THE WATER LOT,

The discovery of this valuable lead in a location where it was generally considered that the claims were exhausted, has caused considerable excitement among those interested in gold mining. \$150 bull a single season, while his by whom they are written, we will be value a year hence will be quite as in a better position to understand the large as now. And this result may be depended upon annually for half a dozen years. There is no doubt that has taken place respecting the Protective Tariff, and the necessity that exists to make, above everything that the above formers will be fully that the above figures will be fully realized. Query: Why are not more such animals introduced into every neighborhood where farm stock is kept? Similar figures apply to horses, swine, sheep, etc. A multitude—indeed the great mass—of farmers do not hesitate to graft their farmers do not hesitate to graft their farmers do not hesitate to graft their farmers. The drinker, while under its influence, shot his son-in-law, and his sufficience, shot his son-in-law, and his son include, shot his son-in-law, and his son-in-law, and his son-in-law, and his son-in-law, and his sufficience, shot his son-in-law, and his son-in-law and trial cost the country more than \$\frac{\partial \text{ for Example in the country more than \$\frac{\partial \text{ for Example in the country more than \$\frac{\partial \text{ for Example in the country more than \$\frac{\partial \text{ for Example in the country more than \$\frac{\partial \text{ for Example in the country more than \$\frac{\partial \text{ for Example in the country more than \$\frac{\partial \text{ for Example in the country more than \$\frac{\partial \text{ for Example in the country more than \$\partial \text{ for Example in the country more than \$\partial \text{ for Example in the country more farmers do not hesitate to graft their this city can favor us with a letter over native apple trees with improved the signature of one honest working scions, yet they are satisfied to keep man, who is not satisfied with the on raising, caring for, and using present tariff, and the change it has offend the person called upon to play "scrub" animals, when every dollar expended in improved blood is speedily returned many fold!

Broken Limbs of Animals.

sons that broken limbs of horses and

Fighting in Manitoba. to heal, or acquire sufficient strength to support its share of the animal's

weight. I heard of a case, some

time since, which was successfully

treated in the following manner, viz:

Two pieces of scantling or joist, suf

LETTER TO A WINNEPEG ROMAN CATHOLIC PRIEST ABOUT THE INDIAN HOSTILITIES.

linen was then passed under him, and the two opposite ends confined to the scantling, so as to raise him from the ground or floor when required; a wooden box was provided with a bottom, two sides and one with a bottom, two sides and one or ground or floor when recent fight, as follows:—On the 5th of September a party of Indians, thirty strong, mounted on horseback, attacked a small camp of the inhabitants of ed a small camp of the inhabitants of this difficulty by putting one hand on the stable; a piece of strong tents of a private letter received from tents of a private letter received from the west, which gives the particulars of fresh Indian hostilities on the frontier, or else a different version of the recent fight, as follows:—On the 5th of September a party of Indians, thirty strong, mounted on horseback, attacked a small camp of the inhabitants of the west, which gives the particulars of fresh Indian hostilities on the frontier, or else a different version of the foreit will cause much merriment, if the proper questions are put.

4. Put one hand where the other cannot touch it. One can get out of this difficulty by putting one hand on the foreit will cause much merriment, if the proper questions are put.

4. Put one hand where the other cannot touch it. One can get out of this difficulty by putting one hand on the foreit will cause much merriment, if the proper questions are put.

4. Put one hand where the other cannot touch it. One can get out of this difficulty by putting one hand on the foreit will cause much merriment, if the proper questions are put.

5. Put one hand where the other cannot touch it. One can get out of this difficulty by putting one hand on the foreit will cause much merriment, if the proper questions are put.

6. Put one hand where the other cannot touch it. strong, mounted on horseback, attacked a small camp of the inhabitants of the mountain. The camp was composed of sufficient length, width and depth to contain the leg from the knee to the foot, inclusive, besides a space of half an inch or more on each side of the leg, to admit the necessary bandages, &c., with bottom cut away sufficiently for the foot to enter and retain its natural relative position with the leg. The broken leg was confined in the box together with the leg from the knee to the foot confined in a horizate that bones are when broken, and the box together with the leg from the knee to the foot confined in a horizate that the camp, and lively firing at once the foot confined in a horizate that the camp, and lively firing at once day and a night. A young man with chair—any other object will do as the camp, and lively firing at once day and a night. A young man with chair—any other object will do as the camp of the inhabitants of this difficulty by putting one hand on the elbow of the other arm.

5. Place a pencil on the floor so that once cannot jump over it. May be done by putting it close to the wall or the room.

6. Put a question that no one can answer with a "not" This is not and treated in the usual manner that bones are when broken, and the box together with the leg from the knee to the foot confined in a horizate that the camp, and lively firing at once commenced. The battle lasted one day and a night. A young man with the last word been uttered than every rifle was pointed towards the camp, and lively firing at once commenced. The battle lasted one day and a night. A young man with the last word been uttered than every rifle was pointed towards the ring on the finger and pushing the chair—any other object will do as the camp of the close to the wall or the elbow of the other arm.

5. Place a pencil on the floor so that one cannot jump over it. May be done by putting it close to the wall or the room.

6. Put a question that no one can answer with a "not" This is not the floor so the floor

box together with the leg from the knee to the foot confined in a horizontal position, or nearly so, by straps of leather or other suitable substances passed over the horse's back, and the two ends confined to the box; the horse was permitted to the box; the horse was permitted to the foot confined to

put his other three feet upon the floor, sufficiently to preserve a healthy action to the limbs, but not so as to permit him to displace the broken limb in the box and injure it. A cure was effected in the course of

best kind of stock to ship from Canada to the old country market; "You state that a commission has been appointed to take evidence as to the pointed to take evidence as to the large of the substitution of the state that a commission has been appointed to take evidence as to the large of the substitution o have been rich, and have all I need, longing to the camp were taken away man misjudge himself unfortunate, of best breeds of cattle for crossing.

Of course this is meant to benefit the farmer by enabling him to feed off farmer by enabling him to feed off say from six to twelve months earlier, and the butcher to get less bone and more beef (and fat in the right places), which is an important factor in the breeding of cattle. The land are described in the breeding of cattle. The land are described in the breeding of cattle. The land are described in the land also his jaw broken. A woman carrying a child in her arms was shot substantially free from debt. Hungin the abdomen. You will please in the abdomen. You will please in the abdomen. You will please in the above to be published, so that the Government may take measures to protect these poor unfortun.
