Dealers and consumers prefer the poultry to be dry picked in the most correct manner. The birds present a better appearance and there is less danger of decay than when the flesh is scalded. One of the dealers emphasizes this point when quoting the prices in the Bulletin. He also advised fasting the birds for twenty-four hours before killing, but the birds should be given all the water they wanted during their fast. He also said that a better price would be paid for birds that had been fasted before killing and the entrails not drawn, for such birds would stand storage and shipment much better than those with run crops, which would soon become a putrefying mass and better than those even for the drawn birds when the flesh and the interior of the birds exposed to the germs of decay. The following prices are quoted for dry picked:

Turkeys, 20c lb.; chickens, 15c lb.; fowl, 12 1/2c lb.; ducks, 15c lb.; geese, 14c lb.
