

Are the Lines Across this Figure Equally Heavy and Black?

If they appear otherwise your eyesight is defective. This particular defect of vision is called astigmatism, and is the most common form of eye error. Astigmatism, when advanced in development, is one of the most serious of all eye troubles, imposing strain on the entire nervous system. Properly fitted glasses will correct this error, relieve the strain and generally increase your vitality and efficiency.

We have a special instrument for the location and measurement of Astigmatism.
