"A scream from start to finish."
—HERALD

"A theatrical treat that should not be overlooked."
—N.Y. TRIBUNE

Activities of the Grand Falls Elks

The Elks of Grand Falls have opened up their winter programme with a bang. The first run in the barrage was a smoker held in the Town Hall on the night of November 23rd. After the regular meeting—which was largely attended and at which two candidates were initiated into the mysterious Order. About sixty members gathered in the supper room (after the needs of the winter had been attended to) a programme of speeches, songs and recitations—punctuated and varied by choruses—was gone through. It is not necessary to go into details; it was a real Elks' gathering. Good food and good fellowship; speeches short and to the point; songs and recitations carefully selected and well delivered; and choruses old and hearty. It is not surprising that when the homecoming migration started a good many of the guests found that the hour was considerably later than they supposed. The evening proved one thing—that it "well begun is half done" the Elks' gathering. Although generally considered a purely American Order, the Canadian (or, since last year, the Canadian and Newfoundland) Order has been in existence for twelve years and has a large rapidly growing membership. Instituted in Vancouver in 1911, its activities were, until 1920, largely confined to the Pacific Coast and the Prairie Provinces. Since that date, however, the movement has been to a great extent in an easterly direction, so that now flourishing Elks' Lodges may be found in most of the cities and larger towns in Eastern Canada. Montreal Lodge, with a membership of over a thousand, and headquarters in the Mount Royal Hotel, is the largest Lodge in the East, and one of the largest in the Dominion. It is estimated that the membership at the end of the present year will be not less than 5,000.

Grand Falls Lodge came into being over three years ago. In 1920 it became a part of the Canadian Order, which, in order to extend its scope so as to take in this country, changed its incorporated title to read "Canada and Newfoundland." From a small beginning the Lodge has grown steadily until it now has a membership of about one hundred and a financial position that any organization might well envy. At the present rate of growth, the membership at the close of 1924 will be not less than two hundred.

Plans are now being made for a very active season. During the winter a series of entertainments will be given, the proceeds of which will be used to swell the Elks' Charity Fund, which is at the service of every deserving cause. The formation of an orchestra is under consideration. Preliminary plans are being made for the formation of a "Ladies' Auxiliary," which will greatly increase the strength of the Lodge in social and charitable affairs. On the whole the Lodge expects to have a lot of fun this winter, and, at the same time, to do a great deal of good; and this—when all is said and done—is the only reason for the existence of any fraternal organization. It is expected that Lodges will be organized during the winter in St. John's, Bell Island, Corner Brook and probably one or two other centres, so that when the Grand Falls delegates leave for the Annual Convention at Calgary in August, they will be accompanied by the representatives of several other Newfoundland Lodges. An Order, whose aim is to make life sweeter, men better, and the world happier, cannot fail to have a great future in Newfoundland.

Grand Falls, Nov. 26, 1923.

WOMEN! DYE ANY GARMENT OR DRAPERY

Mystery Man Said to Be Able to Stop Motors

BY MEANS OF WIRELESS.

Paris, Nov. 24.—The most mysterious figure in Paris to-day is an engineer who is said to have perfected means of stopping motors in passing automobiles by projecting wireless rays on the magnetism.

get level with the Germans who for some months have been suspected of forcing Paris-Prague planes down by means of similar rays.

Intestive among scientists, disclosed considerable skepticism. Senator J. L. Breton, former Air Minister, says: "The thing does not appear improbable if it is a mere matter of stopping the motor a short distance away. But that would not indicate a possibility of repeating the exploit at a great distance."

port before making up my mind. Moreover, according to my own personal information, it is not true that the German experiments have succeeded in the case of automobiles a short distance away, but that the problem involved in stopping airplanes at a distance is more difficult. President Flandrin of the French Aero Club, also a former Air Minister, admitted that the invention, if confirmed, would revolutionize aeronautics. Director Toussaint of the Technical Aeronautical Experimental Institute declares: "The invention, if perfected, is sur-
