For cross-cutting sod and working up certain kinds of clay soils there is no better implement in use than the CORBIN Slicer Disc Harrow.

Before beginning to build these we thoroughly investigated the merits of the various disc, spade, and cut-away harrows made both in Canada and the United States and being forced to the conclusion that the CORBIN Slicer Disc Harrow is decidedly the best, we secured the patents and now give the public the benefit of our selection. The Reversible throws either inwards or outwards as desired. The Non-Reversible throws inwards only.
