Address: "THE CANADA LUMBERMAN," Peterborough, Ont.

ICEBERG DUST.

One of the most interesting facts contributed by Prof. Furdenskjoeld to Popular Science is contained in his account of his examination—when about 80° north latitude, before reaching Fary's island, to northwest of Spitzbergen—of the snow which covered the icebergs, and which had come from a still higher latitude. He found it strewn with a multitude of minute black particles, spread over the surface or situated at the bottom of little pits, a great number of which were to be seen on the outward layer of snow; many of such particles were also lodged in the inferior strata. This dust, which became gray on drying, the professor found to contain a large proportion of metallic particles attracted by the magnet, and capable of decomposing sulphate of copper. An observation made a little later upon other icebergs proved the presence of similar dust in a layer of granulated crystalline snow situated beneath a stratum of light, fresh snow, and a hor of hardened snow. Upon analysis the professor found this matter to be composed in varying proportions of metallic iron, phosphorus, cobalt and fragments of diatomaceous earth.—*New York Sun.*

What It has Done.

Mr. George Simpson, Toronto, says: "I have suffered severely with corns, and was unable to get relief from treatment of any kind until I was recommended to try HULLOWAY'S CORN CURE. After applying it for a few days I was enabled to remove the corn, root and branch, without pain whatever, and no inconvenience in using it. I can heartily recommend it to all suffering from corns."

GRAND

Colonial Exhibition in London, ENGLAND, 1886.

FIFTY FOUR THOUSAND FEET RESERVED FOR CANADA.

First Royal Exhibition Commission Since 1862.

THE COLONIAL AND INDIAN EXHIBITION to be held in LONDON, England, commencing MAY 1st, 1886, is intended to be on a scale of great magnitude, having for object to mark an epoch in the relations of all the parts of the British Empire with each other.

In order to give becoming significance to the event, a Royal Commission is issued for the holding of this Exhibition, for the first time since 1862; and His Royal Highness the Prince of Wales has been appointed President by Her Majesty.

The very large space of 54,000 square feet has been allotted to the Dominion of Canada by command of the President, His Royal Highness.

This Exhibition is to be purely Colonial and Indian, and no competition from the United Kingdom or from foreign nations will be permitted, the object being to exhibit to the world at large what the Colonies can do.

The grandest opportunity ever offered to CANADA is thus afforded to show the distinguished place she occupies, by the progress she has made in AGRICULTURE, in HORTICULTURE, in the INDUSTRIAL and FINE ARTS, in the MANUFACTURING INDUSTRY, in the NEWEST IMPROVEMENTS in MANUFACTURING MACHINERY and MATERIALS, in PUBLIC WORKS by MOULDS and DIECASTINGS; also in an adequate display of her vast resources in the FORESTS, and in FOREST and MINERAL wealth, and also in SHIPPING.

All Canadians of all parties and classes are invited to come forward and vie with each other in endeavouring on this great occasion to put Canada in her true place as the greater colony of the British Empire, and to establish her proper position before the world.

Every farmer, every producer, and every manufacturer, has interest in assisting, it having been already demonstrated that extension of trade always follows such efforts.

By order,

JOHN LOWE,

Sec. of the Dep't. of Agriculture.

Ottawa, 1st Sept., 1885.
