Vol. VI.—No. 6.

TORONTO, JUNE, 1897.

\$2 00 PER YEAR.

Printers' Rollers

and **ROLLER
COMPOSITION**

THE
Gatling Gun
Process

WE HAVE the only modern Roller Plant in Canada, known as a "Gatling Gun" plant. This is the up-to-date method of casting Rollers. The moulds are filled under pressure, making solid, perfect Rollers. Every Roller is guaranteed. These Rollers are more durable and in every way superior to the old hand-cast Rollers.

We use only the best materials in our Roller Composition. The ingredients are melted by steam and thoroughly mixed together by electric mixers. Modern science has been made to do service in our Roller Department. Every printer should use our Rollers and Composition. They have no superior.

Send your cores to us.
