

NEW CAMPBELLTON,
13th February, 1874.

C. J. Campbell, Esq., Baddeck.
Dear Sir :—

* * * * *

I may here say in reference to your Mining property, which I have carefully examined in the four past days, that it is high classed. Independent of an inexhaustible supply of coal from the present known seams of four, six, and two feet, all of which are of good marketable qualities, you have fitted up a working plant for the development of these resources such as you will rarely find, even in the advanced ideas of the old country. There is also a never-failing supply of splendid lime stone, slate, building stone, and sand.

ARCHD. GILCHRIST.

HALIFAX, N. S., 26th March, 1874.

C. J. Campbell, Esq.,
Dear Sir :—

In answer to your enquiry concerning quality of coal received from you, we beg to state, that for steam purposes, we have found it quite equal to any Cape Breton coal, and if a little more free from slate more lasting and equal to any for general purposes.

Truly Yours,
W. S. SYMONDS & Co.,
L. Symonds.

HALIFAX, March 30th, 1874.

C. J. Campbell, Esq.,
Sir :—

In answer to your inquiry as to the quality of the New Campbellton Mines Coal, I beg to say that I bought and stored several cargoes, two years ago, of your New Campbellton Mines Coal. I subsequently retailed it out to my customers. I never heard any complaint against the quality of it. I consider it fully as good as any Cape Breton Coal that comes to this market for domestic or steam purposes, and is much harder and stands more handling than most Cape Breton Coal.

Yours Truly,
JAMES McDANIEL.

HALIFAX, April 4, 1874.

C. J. Campbell, Esq.,

In reply to your inquiry regarding the quality of the New Campbellton Mines Coal, I beg to say that for the several years that I acted as agent for sale of said coal, I sold large quantities to
