WESTERN "U" DID NOT EMPLOY CANADIANS

TORONTO, Oct. 6.—The Ontario Association of Architects, the provincial section of the Architectural Institute of Canada, does not approve of the action of Western University at London in proposing to employ a United States firm of architects. The proposal to collect several hundred thousand dollars in the province for the purpose of providing facilities to produce and improve Canadian brains on the one head, only to employ United States brains on the other does not appeal to the Ontario members of the profession. The water supply is likely to be the chief topic. Well drilling operations have been in operation for some time, but no large drinking supplies have been discovered. The commission will decide whether to continue with these experiments or to go further afield in search of spring water. Commissioner F. G. Mitchell favors the latter plan, pointing out that there are large supplies of water in the vicinity of Komoka which could easily be connected with the present system.

Another question for consideration will be the rebuilding of the Springbank dam.
