

VENNOR'S ALMANAC

1877

WINTER AND SPRING

"There is much to be learned even from the very simplest things in nature, and when we begin to enquire about such of them as are seen and made use of every day, it is astonishing how little is really known, even by well-informed persons, and how large is the field of observation."—*Geological Gossip.*

Registered in accordance with the Act of Parliament, by JOHN DOUGALL & SON, in the Office of the Minister of Agriculture, at Ottawa.
