STEAM BRUSH FACTORY

tions of PAINT WHITEWASH, and SCRUB BRUSHES,

FACTORY and OFFICE, Union corner Carmarthen Street, ST, JOHN, N. B.

PROSPECTUS OF THE

SPRING HILL MINING COMPANY INCORPORATED UNDER LAWS OF NOVA SCOTIA, 1870, C. 72. Capital \$400,000, with power to increase to \$1,000,000. SHARES \$50.

LIABILITY OF SHAREHOLDERS LIMITED TO THE AMOUNT REMAINING UNPAID ON THEIR STOCK.

2,600 Shares are offered by public subscription. \$5 per share to be paid on application; \$15 per share on allotment, 1st July, 1872; \$15 per share on 1st September, 1872, and \$15 on 1st November, 1872; or the whole may be paid on allotment, with deduction of interest at 6 per cent. per annum, on all payments in anticipation of the date when they become due.

DIRECTORS, &c.

Hon, ALEXANDER MACFARLANE, Senator, Wallace, Nova Scotia, President. Hon. ROBERT BARBY DICKEY, Senator, Amherst, N. S. CHARLES H. M. BLACK, Esq., Merchant, Halifax, N. S.

LT. COL. CHARLES J. STEWART, Amherst, N. S. ALEXANDER ROBB, Esq., Proprietor Amherst Iron Foundry, Amherst, N. S.

TREASURER-JAMES S. HICKMAN, Esq., J. S. Hickman & Co., Merchants, Amherst, N. S. SECRETARY-WM. J. MOFFAT, Esq., Barrister, Amherst, N. S.

Bankers-Bank of Nova Scotia, Amherst Branch; and Bank of New Brunswick, St. John, N. B. OFFICE-Mr. W. J. MOFFATS Office, Amherst, N. S.

The Company have acquired, by purchase, three leases from Government of Nova Scotia to Hon Alex. Macfarlane, of one square mile each, of the richest coal deposits in Canada, at Spring Hill, Cumberland County, Nova Scotia, renewable until August, in Canada, at Spring Hill, Cumberland County, Nova Scotia, renewable until August, in Canada, at Spring thick, and the scotia state of the General Mining ist within these areas, which comprehend (exclusive of a portion of the General Mining ist within these areas, which comprehend (exclusive of a portion of the General Mining ist within these areas, which comprehend (exclusive of a portion of the General Mining ist within these areas, which comprehend (exclusive of a portion of the General Mining ist within these areas, which comprehend (exclusive of a portion of the General Mining ist within these areas, which comprehend (exclusive of a portion of the General Mining ist within the areas areas of 10 feet from the surface, and preserving a thickness of 10 feet is mile at an average of 10 feet from the surface, and preserving a thickness of 10 feet is mile at an average of 10 feet from the surface, and preserving a thickness of 10 feet is mile at an average of 10 feet from the surface, and preserving a thickness of 10 feet is mile at an average of 10 feet from the surface, and preserving a thickness of 10 feet is a face) been carried down to the depth of for two thirds of that distance. The slope has lately been carried down to the depth of for two thirds of that distance. The slope has lately been carried down to the depth of two thirds of that distance. The slope has lately been carried down to the depth of the coal, described by Sir 95 feet, exhibiting a marked improvement in the quality of the coal, described by Sir 95 feet, exhibiting a marked improvement in the quality of the coal, described by Sir 95 feet, exhibiting a marked improvement in the quality of the coal, described by Sir 95 feet, exhibiting a marked improvement in the quality of the coal, described by Si

beds of coal will be found in their property per beds of coal will be found in their property be leased to individuals or companies.

A branch railway of 3½ miles has been surveyed, and steps are being taken for its A branch railway of 3½ miles has been surveyed, and steps are being taken for its construction to connect the property by a down grade with the Intercolonial Railway, construction to connect the property by a down grade with the Intercolonial Bay Verte Canal, at a point 21 miles from the head of the Bay Fundy and contemplated Bay Verte Canal, at a point 21 miles from the head of the Bay Fundy and Canal Ca miles to Black River Station.

From the nearness of the outcrop to the surface, and the seams lying on high and
From the nearness of the outcrop to the surface, and the seams lying on high and

ending ground, securing easy drainage, it is considered that these seams may most economically worked.

The freight of a ton from the head of Bay Fundy to Boston or New York is about 75 cents less than from Pictou or Sydney - of itself a good profit, while the difference to 15 to 15 to 10 to

St. John is fully \$1 00.

The Spring Hill coal is well adapted for house, steam and smelting purposes. Situ The Spring Hill coal is well adapted for house, steam and smelting purposes. Situated within 37 miles by rail of the lodes of brown hematite and micaceous iron ore of the richest quality, known as the Acadia iron ore, of Londonderry, it is difficult to assign limits to the quantity of ore likely to be taken to Spring Hill, for smelting by a coal unusually free from sulphur. The large proportion of carbon renders it eminently adapted for manufacturing coke, which, with the coal itself, must be extensively used in the iron and steel works at Londonderry, as well as the Machine shops being expected for the Couragn of the Spring Proportion.

ly adapted for manufacturing coals, and the last the Machine shops being used in the iron and steel works at Londonderry, as well as the Machine shops being used in the Government railways at Moncton.

The portion of the Intercolonial between Truro and Amherst is now being ballasted. The portion of the Intercolonial between Truro and Amherst is now being ballasted with engines driven by Spring Hill coal. It is understood that the line between Truro with engines driven by Spring Hill coal. It is understood that the line between Truro with engines driven by Spring Hill coal. It is understood that the line between Truro with engines driven between these points, already large, be worked in the same way, and the local demand between these points, already large, is steady increasing.

Vessels bringing flour from the St. Lawrence to St. John, Yarmouth, and other lower ports, through the Bay Verte Canal, when completed, may have return cargoes of coal to Quebec, Montreal or Toronto.

From all these sources of traffic, in addition to the Western part of Nova Scotia, From all these sources of traffic, in addition to the Western part of Nova Scotia, the New England ports and New York, it is assumed that an unlimited market will be afforded.

Additional means of shipment will be afforded by the contemplated railway to Additional means of shipment will be afforded by the contemplated railway to Parrsboro—a port open at least ten to eleven months in the year—for which the Nova Scotia Legislature have provided large subventions.

The estimated cost per ton for raising, handling, and putting on board ship, say at mouth of Maccan river, is about as follows:

| and raising, including weighing, screening, &c | |
|--|--|
| Cost on board | |
| Cost | |

If Pictou and Sydney coal can be shipped to Boston and New York at paying prices it cannot fail to be highly remunerative to send a better article from Spring Hill, with an advantage of 75 cents in freight. The local traffic would yield a high rate of profit.

Taking the low average of only 80 cents per ton, inclusive of repairs of machinery,
&c., and assuming only 100 000 tons as the annual production at first, we have a gain
of 20 per cent. on the capital, which might be much augmented by the rent of other
seams, as suggested. From the exceptionally high character of this coal, and the
facilities for raising it cheaply, this quantity, it is confidently believed, might cre long
be doubled or trebled, and a large rate of profit secured even with considerable increase

TESTIMONIALS.

Extracts from Reports of Messrs. Woodhouse and Jeffcock. Mining Engineers, London and Derby, G. B., (January 2, 1866)

The Coal Field which we have carefully examined, and which is the subject of this Report, is situate in the county of Cumberland, in the province of Nova Scotia. It is generally described as the "Springhill' Coal Field, but in re-lity it is a part of the great Cumberland Coal Field.

The first or upper seam we found to be a bed of remarkably good coal presenting a very

SHAWLS

JOHN ROSS, Emgineer Str. City of St. John. Professor Henry Y. Hind, M. A., in his recent Report of Springhill Coal Field, thus sums up:

Thickness of large Springhill seams 13 feet and 10 feet 3 inches. Quality of Springhill seams
of the very first class. Distance of these from Parrsboro by rail, 26 miles. Known outcrop of
Springhill main seam, 11 feet, on which operations could be immediately commenced, about 2
miles

miles.

"The main seem, or what is supposed to be the main seam, has been traced for a distance exceeding one mile and a half in a northerly direction, on the Macfarlane areas."

In Professor Selywyn's, F. G.S., Report laid before Parliament, Session 1872, he thus refers to Mr. Scott Barlow's operations at Springhili: "The evidence, so far as it goes, appears to show that in a distance of about eight handred yards, horizontal measurent, across the strike of the measures, there are eight seams of workable thickness, as under, in descending order. No. 1, 13 ft. measures, there are eight seams of workable thickness, as under, in descending order. No. 1, 13 ft. foin; No. 2, 6 ft; No. 3, 2 ft. 4 in; No. 4; 12 ft. 3 in; No. 5, 2 ft. 6 in; No. 6, a crop, thickness uncertain; No. 7, 4 ft., shaly coal; No. 8, 2 ft.; Total, 42 ft. 7 in." APPLICATIONS FOR SHARES must be made in the annexed form, and forwarded to the Bankers, or to the Secretary at the Company's Office, where the By-Laws may
