is the chief Canadian subject discussed in today's papers. The Japanese correspondent of the Morning Post, resident in London, who probably reflects his views of the Japanese embassy, expresses confidence that Lemieux and the Tokio government will reach a settlement suitable

to both countries.

The Manchester Guardian foreshadows a new element in the situation when the Japanese in British Columbia secure naturalization for which they are now applying. There will be then a Japanese vote for the politicians

Vancouver, Oct. 30 .- Mackenzie King. deputy minister of labor, who is invesigating the Japanese riot claims here as special commissioner, unearthed the whole story today from a witness, of the system of boarding house keepers bringing Japanese into this country.

There are four organizations here,

who have contracts with the railway companies and others to supply laborers. They deal with similar companies in Japan.

The immigrants are taken care of by boarding house keepers here, who supply them with work and take about ten per cent of their wages as long as the men are on the job. The men have also to pay the companies in Japan The laborers pay at both ends, and

the companies make big money. Victoria, Oct. 30.-Joseph H. Mac manager of the dominion governmen savings bank in this city, dropped dead of heart failure at his home last night. Dr Montigambert, superintendent of the dominion quarantine service, was in town this morning and left in fternoon for Seattle to investigate the health conditions in that city in view of the recent outbreak there of the

News of the engagement of \$18,750, 000 in gold from Europe for importation to New York was followed by the sensational announcement of sales of Amprican toopper abroad which will further increase the tide of foreign money to this country to an aggregate \$25,000. This, with the rapid rise of gold securities on the stock exchange, in some cases as much as four or five per cent, which was naturally followed by a slight reduction at the close, and the policy of the trust companies not to pay out currency, contributed to strengthen the feeling in banking quarters and among the

J. P. Morgan was in touch with the situation in his library on 38th street but did not find it necessary to come

One of the sensational features of the day was the remarkable develop-ments in the copper tide. The United metal selling company reports a sharp advance in the price of copper. Copper which would have readily sold ten days ago at 1014 cents a pound, com-manded 131/2 to 133/4 cents a pound

During the month of October the sales of this company had been between 80,000,000 and 90,000,000 pounds. The bulk of the sales had been for export so that up to tonight it is estimated that in foreign deliveries during November and December there will be 85,000,000 in gold. Sales by the other copper centres have been proportionately large.

The chapter of the New York's bank runs has been finished, was the con-viction stoutly expressed in Wall street, long accustomed to sensational incidents, has resumed its normal appearance today did the thin little line of depositors await their turn at the Trust Company of America, ceased even to attract attention.

CANNOT BORROW MONEY

BANKS TIGHTEN PURSE STRINGS AT WINNIPEG.

GRAIN MEN SAY THEIR BUSINESS IS TIED UP.

Winnipeg, Oct. 29.- In Winnipeg, leading grain men say that they can-not borrow money from the banks to carry wheat across the lakes from Fort n and that all wheat must be paid for when it goes into store at Fort William.

An unprecedented thing happened last week in grain trade. A vessel chartered to come in light from Cleve-land for Chicago was detained four days at Fort William, unable to load because the owners of the wheat could not pay for it and the bank would'nt let loaded until it was paid for. Another vessel chartered and coming in light to load, had to have her expens paid and leave light for Duluth and load there for exactly the same reason.

The men chartering could not pay the bank in advance and the bank would not let the wheat go until it was paid for, except to milling companies, who are still buying high grade wheat in small quantities on the breaks, it has not been possible to sell cash wheat for the past three days. Prominent grain men asked as to be possible result of this tightening of the purse strings of the banks, said that the chances were if it continues that elevators all over the country will cease buying wheat, as a matter of fact some of them are quietly doing that now without making any an-

One man said: "I would not be surprised, if at the end of the present week all but the mill elevators had ceased to buy throughout the west. A prominent commission man said: "We have notified our customers that we can no longer make advances to them and allow their wheat to remain in store at Fort William. For the fuwe will have to ask them to sell as soon as their papers are completed.

******** LARDO'S NEW DREDGE

Powerful Machine is Now Nearing Con

(Special to The Daily News) Poplar, Oct. 26—The completion of the first dredge in the Lardo, located at Gold Hill, is being delayed owing to the non-

arrival of the last shipment of machinery now more than seven weeks overdue. C. R. Buschner, the general manager and G. W. Stead, the engineer, who represent the other interested Philadelphia capitalists, says they will be able to make the neces sary tests before work closes down for the winter months. The dredge is capable of moving 2000 cubic yards of sand daily and a boulder of five tons can be taken away in the scraper. The intention is to go to bed rock, but it is not thought they will go lower than 60 feet, although ther turn out successfully, two more dredge will be built in the spring. The dredging lease extending over five miles of ground, is expected to take ten years to work out. A Philadelphia engineer is experimenting with a separator designed to save the by products which if successful, will be placed in operation on the dredge.

MINING COMING AHEAD

Recent Development in the Mines of the F. R. Blochberger passed through Ne'son yesterday on his way back to Rossland and Spokane from the Lardeau district where

he has been interesting D. Suksdorf and H. Suksdorf of Spangle, Wash., in the Mount Angel, a property lying near the Eva and Ovster-Criterion. Messrs. Suksdorf are satand are now sending up a mining engine to report upon the property and if that report is favorable will proceed to develop it on a large scale, erecting a mill and putting in a compressor plant. There are several veins on the property, that of the Eca and Oyster-Criterion both running ough it, but the vein to be developed is one of quartz, 14 feet wide, asse

which run all the way from \$10.83 to \$574 to the ton. Speaking of some of the nearby proper ties, Mr. Blochberger says that while the Eva is working well the Oyster-Criterion is is also the case with regard to the Kingston, a property which Mr. Blochberger nearly succeeded in floating a couple of years ago, but was stopped, he claims, be cause of an action brought to establish a claim to a small fraction, very much smaller than an acre, and which was successful although the claim has since been aban-doned. The Lucky Jack is putting up a new stamp mill. On the Silver Dollar there has been a lot of work done, the pro-prietors having spent over \$200,000 in de-velopment. This includes a stamp mill and a compressor plant. No shipments have as yet been made, although the mill has been running for the past five months and about 500 tons of concentrates are ready. With the coming of the snow this will be rawhided down by the manager, L. E.

CHEAP RATES TO EUROPE. New York, Nov. 1.—Going to Europe? Now is the time, if you would take advantage of the rate war now being waged among the steamship companies engaged in trans-Atlantic traffic. Effective today, a deep cut is made on east and west bound passages. The Cunard company put into effect reions of \$27.50 for the Lusitania, \$32.50 for the Campania and the Lucania, and reductions of from \$15 to \$30 other ships of the line. The American and Red Star lines, the White Star line and the Atlantic Transport line h also put their rates under the knife, and the economical tourist can now visit the "old country" at a considerature for passage bly decreased expendit
