Upon Them Depend Health of the Children and Beauty of Second Teeth

"Perhaps no one thing in the baby's development counts for so much as do his teeth," says Kathleen article, "Baby's First Teeth. She

"On them digestion depends, OI ligestion nourishment relies, and health or the reverse is the result. The dentist should be consulted vithout waiting for the warning given by toothache, and any cavities filled, though it may be with a temporary filling only. No mouth can be clean and healthy while receiving the deposits from decaying teeth. More, this decaying matter exudes a polsonous pus, which is swallowed to the hurt of the stomach. "The teeth should be brushed at

ter each meal, and all bits of food re moved, if necessary, with a piece of dentist's silk; the mouth should be cleansed by rinsing with milk o magnesia, or a weak sodium bicar borate solution. Too much care can not be taken to ensure strong, heal

hy teeth to the baby.
"Crooked teeth are more liable to decay than are those that are straight; and crooked teeth cannot o as good work in cutting and grinding the food as straight, even eeth, and the stomach suffers; crooked and decayed teeth are often the unsuspected cause of indigestion. Teeth that are not straight and even, or are decayed, spoil the shape of the mouth, and discount the sweetest smile and brightest face ever held up for a good-night kiss."
