## Proved Antitoxin

And the proof begins with the first step in the process of manufacture—the selection of healthy, vigorous horses—animals that have been pronounced sound by expert veterinarians. It ends only when the finished product is wrapped and labeled for the market. Our

### Antidiphtheric Serum

AND

### Antidiphtheric Globulins

are tested and retested—bacteriologically for purity, physiologically for activity. They are aseptic. They are of accurately demonstrated antitoxic strength. The syringe container in which we market them is a model of convenience and security.

500, 1000, 2000, 3000, 4000 and 5000 units.  
Prices, per given number of units, are the same  
for both Serum and Globulins.

NOTE.—Our facilities for producing serums and related products are the most elaborate in the world. We maintain a large stock-farm, equipped with model stables and supervised by expert veterinarians, where are kept the animals employed in serum-production. Our biological laboratories are the admiration of scientific men who visit them.
