International Gasoline Tractors

AND QUICK ACTION

READINESS for work is just one advantage which International gasoline tractors have over steam tractors. There are plenty of others, but readiness for work is worth thinking about. You don't have to wait to get up steam. There's no time wasted in building the fire. There's no coal or wood or water to haul and no need of a tending wagon. It's a "touch-and-go" matter with the International gasoline tractor. It is ready whenever you are; and when you shut off the power you shut off all fuel consumption that same instant.

The International gasoline tractor is adapted for all work. It can go anywhere and do anything that the steam tractor can. You don't need to be an engineer to run it. You don't need a fireman. It is worth something not to have the flying sparks around. It's light weight, compared with the corresponding steam tractor, is a big point when you consider that you must frequently take your traction engine over insecure bridges and rotten culverts.

That the International gasoline tractor is well adapted to all farm uses is shown by the outcome of the agricultural motor contest at Winnipeg last July, where steam and gasoline tractors were in competition.

The traction engine is to play too important a part in the agricultural development of Canada for you to make a mistake in your purchase. You are invited to look into the merits of International tractors. The International local agent will be glad to furnish you with catalogue and particulars. If none in your town, write to the nearest branch house.
