MADAM LAPLANTE 35 St. Rose St., Montreal. April 4th. "For over two years I was sick and miserable. I suffered from constant Headaches, and had Palbitation of the Heart so badly that I feared I would die. There seemed to be a lump in my stomach and the Constipation was dreadful. I suffered from Pain in the Back and Kidney Disease.

I was treated by a physician for a year and a half and he did me no good at all. I tried "Fruit-a-tives" as a last resort. After using three boxes, I was greatly improved and twelve boxes made me well. Now I can work all day and there are no Headaches, no Palpitation, no Heart Trouble, no Constipation, no Pain or Kidney Trouble and I feel like ancio being-and it was "Fruit-a-tives" that gave me back my health".

PREPARE

Yesterday and To-day

Wooden shingles of twenty or thirty years ago were of splendid quality, and answered the purpose very well. There was nothing better at that time. In fact no other roofing material was on the market. Yet who would think of putting on shingles to-day? When the deterioration of wooden shingles became noticeable, efforts were made to invent a roofing that would not only be an economical and permanent substitute for wooden shingles, but one that would outlast them in service.

Brantford Roofing was the result. It has "made good." The secret of its success is this: First, the base is of pure, long-fibred felt which is thoroughly saturated with asphalt or mineral pitch. The asphalt and crystal roll roofings are then thickly coated with

crushed rock particles, which adhere tightly to that base, and the whole forms a permanent fireproof, water-tight roof.

Brantford Asphalt and Rubber Roofing are made in three different weights. Crystal is made in heavy weight only, and in red or green natural colors. All three grades are pliable and well suited to either flat or steep roofs.

Brantford

Roofing

comes in rolls with protected ends. The layers do not stick together and the roofing is easily laid. It requires no painting or tarring when put on. It does not crack with the cold nor melt with the summer's heat. It does not curl, split, rust or blow off. It gives permanent weather and fire protection at a reasonably low initial cost.

May we send you our roofing book and samples? They will show you the real value of these roofing materials.
