HOW TO POT PLANTS

Many Wrong Ways and Hints About Right Method

Though it may seem a simple matter enough on the surface, there is a good deal in potting plants properly. The pots should be well drained, using for this purpose pieces of broken pots, and placing one large piece ever the hole in the bottom of your pot. A little sphagnum or rough material of some kind should next be placed over the crocks to keep the soil from being washed down and blocking the drainage. Then put an inch or so of the soil before placing the plant in position, and fill in with the compost, pressing this down rather firmly with the fingers until the pot is nearly but not quite full. If the pot is overfilled insufficient room is left for watering, while, if

room is lett for watering, while, if not filled full enough, not only does the pot contain enough soil, but the plant is liable to become "drowned" when water is given. There ought always to be enough space left between the top of the pot and the surface of the soil to permit giving surface of the soil to permit giving sufficient water to saturate the whole of the soil and moisten all the roots. Some people seem to threw the plants into the pots almost any how, and still they grow and do well -just a large piece of crock over the drainage hole (sometimes not even that), and then perhaps a few of the rough lumps of the compost being considered quite sufficient.

This plan may answer well enough in a country graden where plants seem to thrive under any condition, but too much care cannot be taken in the town garden. Something al-ways depends upon the state of the soil or compost. If it is sufficiently coarse or porous, comparatively little drainage will be necessary, but if at all fine, plenty should be given. Plants that require much water such as spiræas, etc., should also have plenty of drainage. In fact this should be done in almost all cases, as, if a little too much water is given at any time, no harm is done. Most plants, especially those of the "hard-worded" or shrubby type, require to be potter very firmly—that is, to have the soil made almost hard in the pots—but in the case of soft-wooded plants. generally, pot rather loosely for rapid growth, and more firmly for early

For drainage one large piece crock is inserted with the hollow side downwards. This should always be sufficiently large to well cover the drainage hole at the bottom of the pot, and any other material for drainage such a ssmaller crocks, should sur Place. Satisfaction guaranteed. Phone

Manual of sand, fibrous loam, and leaf

mount of sand, fibrous loam, and leaf

mount of sand, fibrous loam, and leaf mould, can hardly be made too firm by fair means, but a soil composed solely of heavy garden loam will have its porosity endangered if rammed about the root with undue vigor. In all pot-ting operations, see that the roots of the plants are laid out in the soil, that is, to, say, they should not have the soil thrown on them, but among them. It is wise also, generally, to finish off with a surfacing of sand, while the compost should be slightly lower at the rim of the pot than at

BUDDHA'S GREAT TOOTH

Held in High Reverence in Shrine

At all times of the year, in Kandy.
Ceylon, may be seen followers of
Buddha making their way to the great
Mahigawa Temple, the "Palace of the
Sacred Tooth," in order to lay offerings and flowers at the shrine of the
County of their religion. Entering ngs and flowers at the surface of the counder of their religion. Entering the temple, they pass into a small to a reserve bid. the temple, they pass into a small room, some 12 feet square, in which is kept the famous tooth of Buddha. The chamber is lighted by two lamps which have not been allowed to go out for years. The walls are splendidly decorated, and the vessel—called the Karundua—containing the tooth, stands on a massive silver table

amids a gorgeous array of jewels and other valuable gifts. The Karundua is draped with muslin, beneath which is a silver dome, studded with gens, and under this is a dome of gold, beautifully carved and literally en-

King George's Letter

His Majesty the King wrote a letter at Windsor Castle when he was six years old, and i realized \$30 at a Red Cross auction sale at Slough. It was penned in long, clear, upright characters, and read as follows: "I am writing with your lowely ink, and thank you so much for bringing it down last"

a Iew of my neighbor settlers down to tweether down here wood of the months in old Ontario where woodlots no longer exist, I think the farmer occupying that land could tell them nough in ten minutes to person the derived with their actual signatures.

Each tender must be accompanied by an accepted cheque on a chartered bank, payable to the order of the Honourable the Minister of Public Works, equal to ten being the derived with their actual signatures.
