Young Peoples Service on Monday Evening at 8 p. m.

Prayer Service on Thursday Evening at 8 p. m.

All are welcome at these services

Hail Insurance.

Hail insurance is practically only a term in Eastern Canada, but in the West it signifies something of vivid importance. Measures known as Municipal Hail Insurance Acts are in force in each of the Prairie Provinces. These acts provide a system of mutual insurance under which rural municipalities can operate to tax each other for the granting of compensation to individuals for losses incurred by hail, which are often very serious. How the system works out, and the extent to which it operates in Saskatchewan and Alberta, are set forth in the November number of the Agricultural Gazette of Canada. Each claimant is entitled to receive not more than five cents per acre for every one per cent. of damage from hail he has sustained. To some this may not appear a very liberal provision, but when it is understood that the number of claims filed in 1919 in Saskatchewan was 7,838 and that the total indemnity paid amounted to \$1,911,776, a different view will obtain. For one storm alone that occurred in July of the year referred to claims amounting to \$1,100,000 were satisfied. In Alberta the total losses for the same year were \$566,000, against a valuation of \$12,000,000 insured. Besides the system under Government supervision, there are 36 companies in Saskatchewan that accept hail insurance, and that paid out \$1,750,000 in 1919 for losses caused by hail.

The Wild Gooseberry.

The gooseberry when compared with other cultivated fruits is not as important in America as it is in North Europe, and especially in the British Isles where it has long been very popular, and a wonderful improvement has taken place in its size during the last two or three hundred years. When it was first cultivated in Europe—probably in the sixteenth century—the wild fruit, if it was like what it is now, would be only about one-half an inch in diameter and less than one-quarter of an ounce in weight. The largest gooseberries which have been produced in recent years average several times this size, some specimens two ounces or more in weight having been recorded. The English and European gooseberries are derived from a species native of North Europe, called Ribes Grossularia.

As the gooseberry is a native of Canada and is found growing wild almost or quite to the Arctic circle, its culture will eventually no doubt be extended very far north.—W. T. Macoun, Dominion Horticulturist.

Salmon Fishing.

Fishing for salmon is prohibited at the present time in nearly all the rivers of Alaska and altogether in the southeastern part of the territory. Meanwhile the fishery goes on, but it is marine fishery. The salmon are caught on their feeding grounds out at sea with purse seines, gill nets, floating traps and fish lines. Trolling for salmon is great sport and is particularly fine off the straits of San Juan de Fuca.

Our Wheat.

Canada's most important cereal crop is wheat. It covers 36 per cent. of the land in crops, and forms 25 per cent. of the value of all crops. Saskatchewan alone has more than half of the wheat acreage of the Dominion. Yield, 1919, 182,260,400 bushels; value, \$360,573,000.

Exhibition Trains.

An exchange of exhibition trains for showing in one country the products of another is a recent trade-extension project that is attracting attention in Canada. The Canadian National Railways have arranged for the transportation of exhibits of French goods through Canada, and Canadian manufacturers will be able to secure a similar exhibition of their goods on a train that will be taken through the principal cities of France.
