POLICE NEWS.—On the night of Wednesday the 28th ult., while the Police were conveying a young man to the Station charged with being disorderly, &c., a crowd assembled, three or four of the most determined of whom signalled themselves by making an attempt to rescue the prisoner. The Police were obliged to draw their batons and assume the defensive. They succeeded however in closing their man, and appeared on the street again where one of the would-be rescuers had put himself in a fighting attitude. He shared the same fate as the first, but not before leaving the imprint of his boots on the face, arm and leg of one of the Police.

That morning those two were fined £1 each—the morning following three of the gang appeared voluntarily, pleaded ignorance and were fined in the like amount, with a wholesome caution from the worthy Magistrate.—Com.

The Press on the Herald.

There lies before us the first number of the "Carbonear Herald and Outport Telephone," a paper lately started in the above town by J. A. Rochfort Esq., of St. John's. The first issue of the "Herald" is got up in a very creditable style. (H. G. Standard.)

We are happy to observe that Mr. Rochfort has established a journal at Carbonear in Conception Bay, under the title of "The Carbonear Herald and Outport Telephone." The paper is very creditably "got up" and will no doubt prove highly useful to the Bay generally, and to Carbonear in particular it must supply a great local desideratum. We wish the new journal all that success which the praiseworthy perseverance and industry of Mr. Rochfort, its editor and proprietor so rightly deserves.—Patriot.

The first number of a Newspaper entitled "The Carbonear Herald and Outport Telephone," has been received at our office. The "Herald" is to be published weekly, on Thursdays at Carbonear, by J. A. Rochfort, Esq., late of this city. The number before us is well printed, contains a good selection of foreign and local matters, and its Editorial department will we feel assured, be conducted with judgment and ability.—Gazette.

TELEGRAPHIC.

HALIFAX, June 2nd. Major Cavagnari accompanied Ameei to Cabul. Bismarck demands that Bremen and Hamurg surrender their privileges as free cities. Chelmsford returns home when Wolsey arrives at Natal. Spanish Cortes met. King promises abolition of slavery in Cuba. Etna eruption increasing.

June 3rd. The weather in England unseasonably cold. Eruption of Etna pours lava from thirty new craters. Russian towns of Wolnick and Grofex and four large villages burned—thousands of peasants reduced to beggary. Contests between Chilean and Peruvian vessels without decisive result. Chilean fleet destroyed submarine cable and burned defenceless town. Peruvian iron cad sank a Chilean wooden ship. Peruvian iron-plated ship "Independence" wrecked.

June 4th. Cashmere famine depopulated many villages and towns. Lionel Rothschild, chief partner of Rothschild's firm is dead. Zogedin dyke finished. Attempt to blow the building occupied by military at Kieff frustrated. Great flood in Italy. Mount Etna flooded. Etna emitting streams lava half mile wide. Immense destruction of property. Duke of Argyle arrived at New York and proceeds to Canada to-morrow. Will remain six weeks.

Religious News.

The Bishop of Newfoundland return to St. John's from Conception Bay, Friday. His Lordship preached in the Cathedral on Sunday last. He leaves this week for visitations in Trillingate, Herring Neck and Fogo. The Rev. Pere L. LeCasse, O. M. J. for some years connected with the diocese of Harbor Grace, as missionary to the Esquimaux on the Labrador, and other tribes further north, arrived per 'Alhambra' during last week. Within the past few days the Rev. gentleman has been the guest of His Lordship the Bishop of Harbor Grace, and will almost immediately proceed to Labrador to re-enter upon the arduous duties of his mission. We most cordially wish the Rev. gentleman success in the prosecution of his philanthropic labors. The statistics of the Union Presbyterian Church of Japan, which consists of three missions, namely, those of the American Presbyterian, the American Re-

formed and the Scotch United Presbyterian churches, are as follows: There are in all 15 ordained missionaries, 2 physicians, 12 teachers, 4 ordained native preachers, 15 licentiates, 18 theological students. The total of the foreign staff is 29; of the native staff, 37. There are 18 organized churches, 41 preaching places, 3 mission stations, and 394 scholars in the schools: The number of members is 790. More than 300 were admitted on profession in 1878 and 35 infants were baptized.

Varieties.

A Book that is always filled with good points for woman—a needle book.

A Felon on the hand is worse than two in the penitentiary.

We should do well to take counsel from the wise and warning from the foolish.

Be sure not to tell a first falsehood, and you needn't fear being detected in any subsequent ones.

Flowers are the universal moralists; not one but has its lesson, its sermon, or its song.

It is more respectable to black boots than to black characters—to sew shirts than to sow strifes.

No German Emperor has hitherto lived as long as the present sovereign. Next to him comes Frederick III., who died in 1493, aged seventy-eight.

We wonder that, among all the titles bestowed upon the moon, none of her poetical appellations have ever spoken of her as Her Serene Highness.

Every woman has a mission on earth. There is "something to do" for every one—a household to put in order, a child to attend to, some degraded or homeless humanity to befriend. The soul is poor indeed that leaves the world without having exerted an influence that will be felt for good after she has passed away.

HONOR THE SCISSORS.—Some people, ignorant of what good editing is, imagine the getting up of selected matter to be the easiest work in the world to do, whereas it is the nicest work that is done on a paper. If they find the editor with a scissors in his hand, they are sure to say, accompanying their new and witty questions with an idiotic wink or smile,—"Eh! so that's the way you get up original matter, eh?"

The facts are, that the interest, the variety and usefulness of a paper depends in no small degree, upon its selected matter, and few men are capable of the position who would not themselves be able to write many of the articles they select. A sensible editor desires considerable selected matter, because he knows that one mind cannot make so good a paper as five or six.

Many of the existing customs of the Russian peasants are relics of the old times of paganism. Thus, in the province of Saratov, in a season of drought, the peasants still resort to the ancient fashion of attempting to draw down the rain. In each of the villages every resident old and young, tries to throw a pailful of water perhaps around a corner, upon some unguarded or unthinking pedestrian. Thus according to tradition, the gods of the clouds are propitiated and send rain.

To Young Men.

Some old genius gives the following elegant advice to young men who "depend on father" for their support, and take no interest in business, but are regular drones in the hive subsisting on that which is earned by others:

"Come, off with your coat, clinch the saw, the plow-handles, the axe the spade—anything that will enable you to stir your blood. Fly around and tear your jacket rather than be the recipient of the old gentleman's bounty. Sooner than play the dandy at dad's expense, hire yourself out to some potato patch, let yourself out to stop holes, or watch the bars, and when you think yourself entitled to a resting spell, do it on your own hook. Get up in the morning, turn around at least twice before breakfast, help the old gentleman, give him now and then a lift in business, learn how to take the lead, and not depend upon forever being led, and you have no idea how the discipline will benefit you. Do this, and, our word for it, you will seem to breathe a new atmosphere, possess a new frame, tread a new destiny, and you may begin to aspire to manhood."

Scientific.

THE MICROPHONE.—Among the new and important inventions is an instrument called the microphone, for augmenting weak sounds. It is said to be so sensitive that even so slight a thing as a pin when laid upon a table, under its influence, is heard to emit a distinct sound. The beating of a pulse the tick of a watch, can be heard at a great distance from the source of sound. It is believed, that when further developed, this invention will prove of great value to medical practitioners. By its means the presence of a bullet can be detected, or the minutest fragment after an operation for lithotomy.

THE ELECTRIC LIGHT.—The select Committee on electric light met again yesterday. Dr. Hopkinson explained that the noise made by the lamp was gener-

ally found when the arc between the two carbons was irregular, which was due to poor trimming. Indium would never produce in incandescence a light equal to the electric arc. Mr. Berly, engineer, Paris, said his company had undertaken the lighting of the Thames Embankment using Jablockoff candle. The cost of lighting each lamp was 5d. per hour, which included the profit of the company. A loss of about 50 per cent. lighting power was caused by the use of globes. Improvements were being made in the light.

At the Metropolitan Board of Works yesterday, a report was presented by the chief engineer and consulting chemist on the lighting of the Thames Embankment by electricity. It was stated that the cost per lamp was 5 1/4 d. per hour, that the cost of gas giving the same amount of light would be 2 1/2 in opal globes. The report declared that the defects connected with the electric light must prevent its adoption as a general mode of lighting.

Another step in the development of the application of electricity to lighting purposes has to be recorded, Mr. Edison's second invention patented in this country having just been published at the Great Seal Patent Office. It is entitled "Improvements in Lighting by Electricity."

Agricultural.

Twenty-four whole potatoes, planted in as many hills, with a handful of bran in each will give a yield of three pecks, and the same number right alongside of them, but without bran will yield only half a bushel.

HEALTHY STOCK.—Every farmer and stock-raiser ought to bear this fact in mind—that burnt corn, coal and wool ashes is one of the very best preventives of disease in pigs, and while such simple remedies are so good they should always be borne in mind and used occasionally, say once or twice a week—an ounce of prevention is better than a pound of cure. Likewise give your horses and cattle free access to salt and a few ashes; and while they are kept in and fed, you will find it advisable also to give them some in their oats at least once a week. It gives animals a general healthy tone. And while such are good, we want a firm y impressed on your minds, and what's more, put in practice.—Farmer's Advocate.

MARRIED.—At St. John's, on the 27th inst., by the Rev. C. Meek, Edwin Edgar Esq., of Greenspond, to Helen, second daughter of Mr. J. R. Ewing. At Carbonear, on the 22nd May, at the residence of the bride's father, by the Rev. John Goodison, Mr. James Taylor, to Miss Fanny, second daughter of Mr. John Winsor.—(Toronto papers please copy.)

Shipping News.

PORT OF CARBONEAR.

ENTERED.

May 29—Marie Alevine, Talbot Monaghan, treat provisions.—John Rorke. June 2—Tracey Jane, Townsend I, Halifax, lumber.—E. Weedon, Hearts Content.

ADVERTISEMENTS.

CAUTION.

The PILLS Purify the Blood, correct all disorders of the Liver, Stomach Kidneys and Bowls, and are invaluable in all complaints incidental to Females. The OINTMENT is the only reliable remedy for Bad Legs, Old Wounds, Sores, and Ulcers, of however long standing. For Bronchitis, Diphtheria, Coughs, Colds, Gout, Rheumatism, and all Skin Diseases it is no equal.

BWARE OF AMERICAN COUNTERFEITS.

I most respectfully take leave to call the attention of the Public generally to the fact, that certain Houses in New York are sending to many parts of the globe SPURIOUS IMITATIONS of my Pills and Ointment. These frauds bears on their labels some address in New York.

I do not allow my medicines to be sold in any part of the United States. I have no Agents there. My Medicines are only made by me, at 555 Oxford Street London.

In the books of directions affixed to the spurious make is a caution, warning the Public against being deceived by counterfeits. Do not be misled by this audacious trick, as they are the counterfeits they pretend to denounce.

These counterfeits are purchased by unprincipled Vendors at one half the price of my Pills and Ointment, and are sold to you as my genuine Medicines.

I most earnestly appeal to that sense of justice which I feel sure I may venture upon asking from all honorable persons, to assist me, and the Public, as far as may lie in their power, in denouncing this shameful Fraud.

Each Pot and Box of the Genuine Medicines, bears the British Government Stamp, with the words "HOLLOWAY'S PILLS AND OINTMENT, LONDON," engraved thereon. On the label is the address, 533, OXFORD STREET, LONDON, where alone they are Manufactured. Holloway's Pills and Ointment bearing any other address are counterfeits.

The Trade Marks of these Medicines are registered in Ottawa. Hence, any one throughout the British Possessions, who may keep the American Counterfeits for sale, will be prosecuted. Signed THOS HOLLOWAY, 533, Oxford Street, London.
