COMPETITORS AND 4000 VISITORS. We were highly gratified at the s of progress displayed by the N-Riding of Huron, at the Fall Show at Clinton on Tuesday and Wedness 19th and 20th inst. As the world mo 19th and 20th inst. As the world moves, North Huron keeps moving too and we are pleased to chronicle the fact that each Fall Show has become a point at which a "new departure" is made towards some higher achievement in atockraising and Agriculture in particular, and other departments as well. The importations of above made by auch men as J. J. Fisher, of Colborne, H. Snell of Hullett and others cannot be too much importations of stock made by such ments as J. J. Fisher, of Colborne, H. Snell of Hullett and others cannot be too much praised. They show an amount of energy and enterprise which ought to be appreciated by the whole community. Mr. Fisher's imported horses were amongst the most interesting sights out of doors, and were illustrious examples of the maxim that "blood will tell." In this connection, we would just give the farmers one advice. We hope they will not gradge to pay Mr. Fisher and such venturesome men prices for services and make them take their stock away to the serious loss of our own County; and the sdvantage of other more liberal sections. The show of Horses was altogether very fine and extremely creditable to the neighborhood. We do not wonder that an American horse buyer now makes Clinton his headquarters and declarss that he cannot anywhere find better supplies sor his trade. There was a fair show of cattle, and less appearance that they had suffered on account of the drought than we anticipat account of the drought than we anticipat solution. Altogether we felt rather proud of colar missaken for a Director of the society in consequence of wearing the prices for services and ed noticing. A magnificent Bull shown by Mr. Suell was a perfect model of high breeding and the admiration of all beholders. The sheep and pigs, prize-takers and characteristics and characteristics. otherwise, were excellent after their kind, and their owners, it will be seen by the Premium list, are very much the same as in former year Curiosity was most excited by the dimutive heads of Mr. Fisher's newly im pigs, a characteristic feature handed down from a long and spotless line of aristocratic ancestors. The fowls were few, lut fair, and chiefly exhibited by Reeve, of Clinton, whom, if as su cessful in curing patients as rearing poultry, which we have no reason doubt, we should pronounce a decided success. The Buggies shown were limited in number, but capitally built. We espected a much larger array of Agricultural Implements. W. J. McCutchcon was there with the Patterson Bros.
Combined Reaper and Mower, for which
he is agent, emphatically labelled "No
deception here." In reference
