Then Planted Mines Along the Whole Trail and Decoyed Makaroff Across Them.

elated over the successes they have absurd, and it angers the German peo-Admiral Togo, particularly of his poverty is abroad, enemy's harbor and decoying him across this field of mines to an equally tion. dangerous flank attack.

The success of the system of placing deadly countermines is due largely to a series of careful observations made by the Japanese during their previous attacks on Port Arthur. The Japanese saw the Russian fleet Leave the harbor and return to its anchorage, and it discovered that the Russian warships followed an identical course every time they came out or went in, evidently for the purpose of avoiding their own mines. The Japanese too bearings on this course. When the destroyer divisions of the Japanere torpedo flotilla laid the countermine during the night of April 12-13, they placed them along this course. The laying of these countermines was ex ceedingly perilous, because if any Japanese boat with mines on board had been struck by a lucky Russian shot, she would have been annihi-

The weather of the night of April 12-13 favored the work. There was heavy rain, the night was dark and

Fall Wheat Crop Badly Damaged by Severe Winter.

GROUND MUST BE REPLOWED

The Recent Big Snowstorm Proved To Be an Angel in Disguise to the Farmer.

Toronto, April 18.-The following reports have been received from correwheat throughout the Province, and of small fruits and fruit trees. The reports are generally optimistic, but in some counties, more particularly Kent and Brant, much of the land devoted to fall wheat will have to plowed up, the crop being a failure. The general condition, however, i probably decidedly better than in the United States, where the fall wheat is far below the average.

FALL WHEAT IN OXFORD.

Woodstock, April 18. - On the whole, the wheat in this district has come through the winter well. The only places where it has suffered have been on heavy land, where it was affected by recent severe frosts. The deep snow which lasted throughout the winter, afforded ample protection, though the high banks along some of the fences smothered the plants to some extent. The recent extraordinary snowfall of a foot and a half will not, it is believed, hurt the crop, but will tend to improve it, as the wheat will be protected from the injurious effect of warm sunshine in the day and frosts at night. This alternate freezing and thawing tends to expose the roots. Up to the present there has been little germination. If the snow disappears slowly and no trying weather follows the plant, it is thought, will get an excel-

lent start.

Guelph, April 18. - The fall wheat in the county of Wellington has come Foo, April 17, 3 p.m.—A letter Port Arthur dated April 8, been received here sayings relucious that and a half with snow. HUMAN RACE ROSE FROM SEA WATER

Startling Discovery Backs Up Darwin's Theory.

THE OCEAN AS SOURCE OF LIFE

Noted French Scientist Finds Many New Elements in the Human Body.

New York, April 18. - The Sun today has the following from London; Ten years ago the injection of salt water as a restorative to patients dying from loss of blood aroused general interest. The discovery of this quality of salt water probably suggested to the French savant, M. Quinton, a long and patient research concerning sea water, the conclusion of which throws unexpected light on and adds support to the Darwinian theory of evolution. M. Quinton maintains that sea water Prof. Haeckel believes, elementary possible as soon as the snow went. The neither more nor less than a marine few cold days of last week, however, one. Our tissues and cells continue to rain and frost, which, as a farmer put the composition bears the closest reaccount of age and long service, and was succeeded on the station by Vice-Admiral Sir Gerald Noel.

Montreal, April 18. - Hon. C. S. Hynan, M. P., London, and Mr. W. F. Mc-Creary, M. P., Selkirk, were joint uests of honor at a banquet Saturay night by the Montreal Reform Mr. James Cochrane, M. P. P., resident, was in the chair. Others resent were: Mr. H. Hamilton, vicechairman; Senators Dandurand, Casrain and Cloran, Hon. J. C. McCorkill, Hon. W. A. Weir; Messrs. Robt. Bickrdike, M. P.; A. Rivert, M. P.; Hon-ore Gervais, M. P.; M Hutchinson, M. P.; Peter Lyall, B. J. Coughlin, J. C. MacDiarmid, J. A. Drouin, Peter Smith and Joseph Fortier.

Rising to respond to the toast, "Our Guests," Hon. Mr. Hyman took occasion to approve of the sentiment of sympathy and harmony that was inreasing between the two Provinces, and then paid a high tribute to Hon. George W. Ross, Premier of Ontario. The Government's majority in that Province, it was true, was small, but with a man of such qualities and instincts of leadership as were possessed by Mr. Ross it would be many days before the Conservative party would et possession of the treasury benches. Speaking of Britain's ability to consume all the wheat grown in Canada, Mr. Hyman said that the other day the Duke of Sutherland had told him that Great Britain, had only six weeks' food supply on hand, and that his grace, as chairman of the recently-formed commission on food supply, had been nduced to come to Canada to take for himself a measurement of the capacity of the Dominion. Figures were then given to show that Canada would in a few years more than satisfy the demands of the mother country. The Grand Trunk Pacific, in giving cheap transportation in the west, would go a long way towards making a protective tariff popular. Mr. Hyman observed that it had been charged that the Liberal party were inconsistent as regards thought they should not be held to account for the statements of individual the country's development. Mr. Hyman concluded by making an appeal for the throwing aside of all pessimistic thoughts and uniting for the progress and prosperity of the Dominion

The main point of interest McCreary's speech, which was full of matter relating to the Northwest, was statement that the Americans ere giving a railway service that afforded the people of Winnipeg every facility to trade with St. Paul and Minneapolis, which was evidence enough of the need for the Grand trying to follow the large immigration from their country to Canada and to secure the trade, and he feared that many Canadians were using the American railways. He knew of some persons who came in via Duluth and other American points who actually had C. P. R. passes in their pockets. Great efforts were also being made to induce Canadians to ship their grain products over the American railways and out via American ports. Senator Dandurand intimated that it would be better for the equilibrium
