## WILL BUY GOODS HERE.

After Three Days Investigation More Americans Decide to Outfit in Victoria.

Messrs. Matthews and Dupras Find by Comparison Victoria Prices Cheaper Than Seattle's.

come to the conclusion that we can do better by buying all our clothing and provisions in Victoria. We will also burchase a great part of our horse feed purchase a great part of our horse feed here."

The above statement was made by compressors, and the compressed air Mr. Joseph Matthews, who arrived in will be used throughout the mine as at Victoria from Seattle with his partner, tour of the outfitting houses here.

Mr. Matthews is a level headed

Mr. Matthews is a level headed American, who has spent a season or so in the Yukon country, and who, in fact, THE SKELETON OF THE EARTH. just returned from Dawson City a fort-

in the Colonist recently that Vic-toria is the cheapest and best place at which to outfit for the North. It is a fact of peculiar significance, that Mr. Matthews in his interview in Sunthat prices for miners' supplies here restrial nature would have been lost to cannot be beaten on the Coast.

us. A striking example of the awful

## A GREAT POWER COMPANY.

English Capital Well Invested for the Development of Kootenay Mining Properties.

of the West Kootenay Electric Light and Power Company, granted a charter by pinnacle perpendiculary towards the the legislature at the last session, in an skies, while the mighty monarch of the interview in Vancouver the other day, Alps, with its never-varying mantle of

The works of the company are situ-The works of the company are situated at Bennington Falls, about 11 miles below Nelson, on the Kootenay river. The works are all completed and the plant is now being installed. As soon as the machinery is all in place we shall be able to start. We are not going to supply the mines of Rossland camp alone but the whole of the West Kootenay within a radius of about 50 miles from Rossland. That takes in a big mining country. We shall supply most of the leading mines in the camp. The works at Bennington Falls have been done by contract and have not yet been handed over to the company.

"Some idea of the actual of the state place? How came the it happen that the three minerals were is a significant to the towering shaft, fills in the background of a picture of actonishing and sublime grandeur, and overwhelming and imposing magnificence.

If we carefully examine a piece of granite we find that at some time it must have been subjected to some process which must have been very analagous to boiling, for the small particles of mica, quarta and felspar are mingled together with even regularity. But how did this take place? How came the cryst-als and particles of each mineral to be all formed of the same size? How did it happen that the three minerals were ated at Bennington Falls, about 11 miles

canal-way 30 feet deep and 27 feet wide, cut out of the solid rock for a distance of 640 feet. The dam, which is of concrete, what a weird spectacle must this im-640 feet. The dam, which is of concrete, is 32 feet high and 18 feet thick at the base. It extends for the full distance seething mass was being incorporated across the fore-bay, some 54 feet, and is together—a molten granite world!

But all these problems which now apreinforced on the sides by huge abutments of concrete. The average rise of the Kootenay river is 22 feet, and the highest flood on record was 32 feet above the minimum height of the sides and those of us who choose to accept the prodigious and startling honor of a pofest above the minimum height of the stream. The dam, therefore, is calculat- creative edicts are issued, will doubtless ed to withstand the severest floods have the added pleasure of being able to which it is likely to encounter. From the fore-bay the water is carried to the another world, which science assures us turbine wheels by three steel pipes, two of which are nine feet in diameter, while the third is a foot larger. At present only the two former tubes will be used.

ously.

"The turbine wheels are attached direct to the generators, without the use of gearing, whereby a perfectly noiseless mechanism is secured. The gates for regulating the supply of water are electrically governed. There are two generators, having together a capacity of 2,500 horse power. Some idea of their size can be obtained from the fact that they weigh, when installed, some 65,000 pounds each. The water wheels them telves weigh 40,000 pounds apiece. The generators are of the three-phase revolving field type, wound to generate at a pressure of 1,040 volts, They operate ously.
"The turbine wheels are attached di-

at 180 revolutions per minute. The exciters used in connection with the generators are operated by two special turbine wheels of their own. The generators are connected by heavy cables to a marble switchboard, from which the current is connected to the step-up transformers, which increase the pressure from 1,040 to 20,000 volts. This is the highest voltage ever utilized for the transmission of power. The electrical current is conducted to the sub-action current is conducted to the sub-station at Rossland over a three-wire line 301/2 miles long. The local sub-section, which is situated on the Monte Cristo ground, is equipped with a high potential switchboard, a distributing switchboard and a series of transfor outfits here and in Seattle, we have sure from 20,000 to 2,080 volts. From

Victoria from Seattle with his partner,
Mr. Napoleon Dupras, several days ago,
and has since the policy of the company to spare no effort to help the local minand has since been making a ling and reduction industries as far as tour of the outfitting houses here.

Deep down in the lower recesses of the solid crust of the earth rest vast masses of a composite rock, farmed of three sepply of provisions and clothing for trading purposes. It is quite probable that he will leave with Victoria merchants between \$10,000 and \$15,000.

When Messrs Matthews and Dupras arrived from the North they went direct to Seattle, where they spent several days looking into prices. According to Mr. Matthews, who is an American of the Americans, they would have purchased their goods in that city had they been able to do so advantageously. As their purchases, however, would run away up in the thousands, they decided to first look into prices here, and the result of their inquiries simply confirms the statements minutely divided fragments and crystals, mixed together in as regular and methodical an order as if the proper proportion of each mineral had been then mingled in conformity with a fixed plan: sometimes a wide district having a predominence of large pieces, with an admixture of differently tinted rock, farmed of three seplants of accomposite from the was about 200 yards from the beach. A landing was effected and next day the chief engineer and a crew of several men got through the veck to the British consult. The rest of the crew were rescued by the steamer Croix Du Sud, two days later. Nothing was saved from the wreck, even the ship's papers being lost in prices here, and the result of their in-quiries simply confirms the statements ton of the crust of the earth," for it ap-made by many of their countrymen in the Colonist recently that Vic-toria is the cheapest and best place 30,000 feet or more in thickness, with all that is thereon.

terms that they had decided to get all their supply of these lines in Victoria. In the matter of clothing, it appears he was ever undecided after he visited several outfitting stores in this city. The decision reached by these two Americans was only made; after several days' careful inquiry and investigation, and the result justifies the oft asserted statement that prices for miners' supplies here cannot be beaten on the Coart.

that prices for miners' supplies here cannot be beaten on the Coast.

From a town south of San Francisco Mr. S. Jones, of the Dominion, received a letter yestarday from an old friend, who stated that many Californians would leave that vicinity for the North shortly, and that they were anxious to know the best place at which to outfit. The writer says it only requires a little judicious advertising to bring hundreds of Californians to Victoria to outfit. At the present time the "P.-I." of Seattle, so the writer states, is the chief medium of advertising in that section, and very little is known with regard to Victoria, although many prospective miners are anxious to learn just what the Canadian duty means to them, and in fact are delaying their purchases until they can get this information. Mr. Jones sent to the section in question a large number of Colonists, with the views of American miners on the outfitting question, and he expects to see good results from this method of advertising the city.

BY A BANKER.

It appears now to be a definitely established fact that our sun is one of the using Hall's Hair Renewer, the ladies' myriads of stars which compose the milky way, and forms part of that derful assemblage of worlds which are collected together in one great band, or encircling belt, completely girdling our solar system as with a luminous cloud. But this apparent cloud of light is a vast multitude of brilliant suns, many probably exceeding our sun in size and brilliancy, for our luminary is but of about the second or third magnitude,—and probably all of them centres of systems, having planets, comets and other great bodies revolving round them. The number of these sums is utterly beyond the reach of our calculation, beyond even the capacity of our finite mind to grasp. Herschel, with the inade-quate means at his disposal, estiquate means at his disposal, esti-mated the number at about 18,000,000. and a later calculation estimated the number in a space equal to a tenth part mer years by an uproarious burning of fire crackers. Free Trial To Any Honest Man The Foremost Medical Company in the World in the Cure of Weak Men Makes this Offer. EALTH AND ENERGY ASSURED. HAPPY MARRIAGE, GOOD TEMPER, LONG LIFE. In all the world to-day—in all the hi orld—no doctor nor institution has world—no doctor nor institution has treated and restored so many men as has the famed ERIE MEDICAL CO. of Buffalo, N. V.

This is due to the fact that the company controls some inventions and discoveries which have no equal in the whole realm of medical science. SCIENCE TRIMMING

So when deception has been practiced in advertise hat this grand old company now for the first time makes this startling offer:

The will send their costly and magically effective appliance and a whole month's course of restorative remedies, positively on trial without expense to any honest and reliable man!

Not a dollar need be advanced—not a penny paid—till results are known to and acknowledged by the patient.

The krie Medical Company's appliance and remedies have been talked about and written about all over the world, till every man has heard of them.

They restore or create strength, vigor, healthy tissue and new life.

They quickly stop drains on the system that say the energy.

They cure nervousness, despondency and an the effects of evil habits, excesses, overwork, etc.

They give full strength, development and tone to every portion and organ of the body.

Failure is impossible and age is no barrier.

This "Trial without Expense" offer is limited by the company to a short time, and application mut be made at once.

No C. O. D. scheme, no bogus philanthropy nor deception, no exposure—a clean business proposition by a company of high financial and professional standing.
