## PERCE.

(By Rev. W. Camp.)

The first thought on reaching Perce is to go straight to the famous rock, Mount Joli, opposite the rock, affords a splendid view but to reach it one must cross a field, and this field is private property. The writer asked permission of the owner "may I walk across your field to the rock?" With that politeness that characterizes our French brothers he replied "You are very welcome to do so." The view of "Pierced Rock" from this point of advantage is most inspiring. There it lies just before you, the huge sleeping giant of the sea, which might be aroused into action at any moment, for it seems to possess the instincts of life. At Mt. Joli, the rock seems very near, although it is 300 feet away. Looking at it from this angle it has the appearance of a large mass-of-war ship whose decks have been swept by the storm and with bow facing you. As you look at it, its bigness grows upon you. No human being has scaled its sides or walked upon its green level top. But to reach the top would not seem an impossible feat. Before the Niagara was spanned different schemes were tried to get a line across until one day a boy's kite flew across, that kite carried a siren thread, that thread a cord, the cord a rope; the rope a chain; the chain a cable; the cable a bridge across which now thunders the traffic of two mighty nations. So the Kite could carry a string; the string a rope; the rope a ladder along which one could easily pass to the top. Or what is more likely to happen, in the very near future, the aeroplane will enable

over sea and land. But next morning on lifting the curtains from her window there before her stretches the great ocean. Almost overcome by the vastness of the sight she cries "Thank God there is something there is enough of." Away in the distance is ship head light at the end of the Gaspé Peninsula, known as the Cap des Rosiers, nearer is Plateau light on Plateau Island opposite Pt. St. Peter. At night these revolving lights—one white and the other red—gleam with wondrous beauty over the vast expanse of blue water. Lying beyond the far-famed rock and to your right is Bonaventure Island. On three sides of this island the coast is high and steep, in many places the rock resembling "Pierced Rock". On one side the land runs down to the sea. On this side are about a dozen houses where there are a number of comfortable homes with considerable cleared land. The fishermen who live there can raise vegetables sufficient for their needs and cut grass and grain sufficient for the stock they need to keep. This is good catches of fish and they are as independent as lords. A sail around the rock and out around the island is one of the most attractive outings one can take. The large gasoline boats can carry a dozen people as easily as rowing. And if the wind is blowing the sea-capped billows will be all the ordinary land-lubber cares to have. One end of the island is inhabited by sea-gulls and the other by gannets. The air is filled with these beautiful creatures whose graceful movements are a constant delight, while upon the ledge upon the shore they sit immovable, reminding one of the early

entertainment and of the reasonable rates which are charged. One gentleman said to the writer: "the tourists to this place always return." Your scribe saw for the first time in his life a number of the ladies after dinner, light their cigarettes and enjoy a comfortable smoke. At first the strangeness of it brought a shock, but on another thought why should not a lady smoke cigarettes as well as a gentleman? Let the men who do not like to see a woman with a cigarette in her mouth set before the fair sex the right example.

The whole of the Gaspé peninsula is full of interest and attractiveness. More and more the people from Upper Canada and the Western States are finding their way down the Gaspé Coast to enjoy their summer holiday in these cool and health giving spots. At Gaspé the Baker House has been full of guests during July and August. At Perce the Perce Rock Hotel has been full and the proprietor has had to refuse more than three hundred people whom he could not accommodate at his hotel and cottages which he had secured for the summer. Increasingly the stream of summer visitors grow as more is learned of the wonderful country whose cool and bracing climate is an antidote to many forms of illness. Mrs. McWhirter has written a most attractive book on the "Restigouche and Bonaventure, The 'North Shore' and the Gaspé Peninsula are made most attractive by her fascinate pen, but she has not over-drawn the picture. And besides, her book contains some fascinating legends which add charm to this wonderful country. Let the tourist remember that not only in July and August are these places attractive, but even so in Sept. and Oct., when the forests as well as the sky are filled with rich and beautiful colors. Many beautiful and attractive summer resorts are open to the present day traveler, and among them are the northern sections of New Brunswick and the ever fascinating Gaspé Peninsula, and until one has seen Perce the beauty and glory of our province's summer lands has not been

## ANOTHER INDUSTRY FOR GASPÉ COAST

Montreal Syndicate May Work Gaspé  
Asbestos—Cheap Shipping  
Facilities.

During the past year or so, some very interesting mineral discoveries have been reported in this province. Quebec, however, is naturally an asbestos yielding province, although such deposits are more or less confined to certain districts. It is now reported, that some large attractive asbestos deposits are located in Gaspé, and it is known that efforts are at present being made to have these deposits worked in a commercial way. There is some advantage in the location of the potential mines, inasmuch as a saving could be made on transportation to the various markets.

A syndicate of Montreal business men headed by Sydney A. Ogden, is at present planning an asbestos development situated on the Gaspé Peninsula, on the Baie de Chaleur. Mr. Ogden, who lives in the city at the present time, having spent the summer months at the property, says that the asbestos deposits which his syndicate control, while not by any means a new discovery, have never been developed except for inch fibre, and that effort was abandoned some fifteen or sixteen years ago. He describes the deposits as being a large low-grade proposition with an extensive available supply of excellent milling stock, and some 2,000,000 tons are in sight and available to the mill.

The asbestos runs in quality all the way from No. 2 Crude down the scale. It is the lower grades of asbestos, however, which, in the opinion of the syndicate, hold out the greater possibilities for development. As the deposits are on the mountainside and are represented by outcroppings, it is said that a commercial working would prove quite feasible, inasmuch as the ore would be carried the short distance to tidewater by gravity cable carrier. Thus, with excellent shipping facilities, including good harborage, the ore could be loaded directly on vessels for shipment either overseas or to the United States markets.

This, it is pointed out, would enable the operators to make shipments, preferably in smaller vessels, say of 100 ton capacity, at extremely low cost as compared with high freight rates from the inland workings to the American and overseas markets. It is also pointed out that there is available within a short distance, sufficient necessary raw materials to enable the operators to begin an asbestos manufacturing industry which would take in cement, asbestos, brick and other asbestos products. Water power is also available.

With excellent and cheap shipping facilities, and a sufficient supply of good labor on hand, it is thought that operations will prove successful. Mr. Ogden says that he has carried out preliminary exploration work at the property and is convinced that proper working of the mine will prove profitable.

In connection with shipping by

## LIST OF PRIZES FOR FAIR EXHIBITS

List of Articles For Which Prizes  
Will Be Given At The  
Fair.

All articles must be entered under  
some one of the sections in the list  
when possible, when not, may be en-  
tered as extra.

Prize colors 1st. Blue  
2nd. Red  
3rd. Green

Highly commended White.  
Prizes (Honorary) will be offered in  
the following classes:  
Foultry—Hens, Chickens, Geese, Tur-  
keys, Ducks, (living or dressed)  
Eggs—White and Brown.

Dairy Produce—Butter, Cheese.  
Garden Vegetables—Beets, Beans,  
Cabbage, Cauliflower, Carrots, Cel-  
lery, Corn, Cucumbers, Onions, Pars-  
nips, Peas, Potatoes, Radish, Squash,  
Tomatoes (ripe and green), Turnips,  
Garden Herbs.

Fruit—Apples, Crab apples, Plums.  
Horticulture—Plants in Pots, Cut  
Flowers, Honey.

Fine Arts—Painting (oil and water  
colors) Stencilling, Brass work  
Basket making.

Women's work—Blankets (home made  
Rugs (hooked and braided) Stock-  
ings (knitted) Socks (knitted) Gloves  
(knitted) Shawls (knitted crocheted)  
Sweaters (knitted, crocheted) Bed-  
room Slippers, Bed-room Sox, quilt,  
Plain Sewing, Embroidery, crocheting.

Household—White Bread,  
Science—Brown Bread, Nut Loaf,  
Pound Cake, Fruit Cake, Sponge  
Cake, Doughnuts, Puff pastry, Blue-  
cuits, Milk rolls, Canned fruits,  
vegetables, Meats, and Fish, Preser-  
ves, Jellies, Pickles, and Candy.

Amateur Photography—Best group  
of six (6) scenic snap shots.

Special prizes for children under 12  
years will be given. Give age of con-  
tributor.

All donations will be sold for the  
benefit of the Hospital.  
The management have also made ar-  
rangements to hold a Baby Show.  
"Batter Babies" is the watchword of  
the day and all mothers should take  
an interest in this part of the pro-  
gramme. Points to be considered:  
Healthy appearance, good looks,  
cleanliness and neatness of dress.  
Costly apparel not called for nor  
considered.

Visitors may feel assured of find-  
ing in the building everything neces-  
sary to the convenience and comfort of  
all during the entire time. An ample  
restaurant will serve meals and re-  
freshments in the building during the  
days of the fair.

COME ONE, COME ALL.

means of small schooners with auxil-  
iary gasoline power, he says that re-  
turn cargoes from New York to Nova  
Scotia points and coal from there to  
Gaspé will be assured, so that cost of  
operating such vessel would be more  
or less small. In this manner, the  
operations could be carried on at a  
respectable saving.

The discovery is within a short dis-  
tance of Port Daniel, which is about  
60 miles west of the town of Gaspé. A  
1200-ton mill is at present spoken of  
with a minimum output of 63 tons a  
day.—Montreal Star.

Two women of uncertain age, who  
had long been rivals in love, quarreled  
over a trifling gift which the object  
of their adoration had indiscreetly  
bestowed on one of them.

"He intended those flowers for me,"  
the elder woman said to the lucky re-  
cipient. "You waylaid him on the road  
to my house and shamelessly robbed  
me of his offering. Your guilty face  
tells tales."

The other woman shrugged her  
shoulders as she sniffed at the pretty  
bouquet and answered sweetly:  
"O' well, my dear, have it your own  
way. At any rate no one will accuse  
you of having a telltale face. It's so  
very difficult to read between the  
lines!"

And now the deadly breach between  
them has widened beyond repair.

Popular Mechanics.

Scientific Parent (on a stroll)—You  
see out there in the street, my son, a  
simple illustration of a principle of  
mechanics. The man with that cart  
pushes it in front of him. Can you  
guess the reason why? Probably not.  
I will ask him. Note his answer, my  
son. (To the Coster): My good man,  
why do you push that cart instead of  
pulling it?"

Coster—"Cause I ain't a hoss, you  
old thickhead."

De Smythe had been waltzing with  
his host's only daughter, and  
was now in a corner repairing dam-  
ages.

Here his would-be-papa-in-law espied  
him, and—  
"D'you know," he remarked, re-  
ferring to De Smythe's late partner,  
"that girl is the flower of my family  
sir!"

"So it seems," answered the young  
man. "But it's a pity she comes off so  
plainly." "It's not," he added, as he made an  
other vigorous rub at the white spot  
on his coat sleeve.

## ENCOURAGE THE SHEEP INDUSTRY

Inducement to Use A Pure Bred  
Ram at the Head of Your  
Flock of Sheep.

The New Brunswick Department of  
Agriculture are co-operating with the  
Dominion Live Stock Branch in en-  
couraging the use of Pure Bred Rams.

Persons Eligible.

Any sheep raiser who purchases a  
pure bred registered ram and who has  
not before at any time used a pure  
bred ram in his own flock shall be en-  
titled to a premium of ten dollars the  
first year, five of which will be paid  
by the New Brunswick Department of  
Agriculture and five by the Dominion  
Live Stock Branch and an additional  
premium of five dollars the second  
year, payable by the Live Stock  
Branch. Applications for premiums  
to be sent in to Live Stock Division,  
Department of Agriculture, Frederic-  
ton, not later than December 1st.

Co-operative Purchasing of Pure-Bred  
Stock.

The Dominion Live Stock Branch  
will pay the travelling expenses to  
any point east of Fort William, Ont-  
ario, of any accredited man appointed  
by a Society, group of Societies or  
group of farmers who have orders to  
purchase at least twenty-five pure  
bred rams for farmers never having  
used a pure bred before. This same per-  
son has the privilege of making pur-  
chases of other live stock or rams for  
any farmer while on the trip, so long  
as the minimum of twenty-five rams  
are purchased as outlined above.

Grading of Pure Bred Rams in  
New Brunswick.

The services of Professor Siskin of  
Ontario Agricultural College, have  
been secured to visit each pure bred  
brooder in the province, and classify  
the rams offered for sale into three  
grades, superior, average and common.  
By purchasing your rams in the pro-  
vince farmers can write any breeder of  
pure bred sheep and be sure of get-  
ting the class of ram he applies for.  
Now Brunswick is the first province  
to adopt this classification system.  
Brooders and Purchasers stand to gain  
by it. The number of rams for sale  
together with the price and grade will  
be listed with the local Live Stock  
Division.

Boys and Girls Sheep Clubs.

In order to create a deeper interest  
among our farm boys and girls in the  
business of sheep raising, arrange-  
ments have been completed to organ-  
ize Sheep Clubs in the province.  
Members must be between the ages of ten  
to eighteen years. Ten members will  
constitute a Club. Two grade Shearling  
ewes will be the number allotted to  
each. Members can get profit from  
any bank for purchase price of sheep  
for one year at 6 p. c. interest. The  
Department will exchange a fair at  
which prizes will be given. The De-  
partment will loan a pure-bred ram to  
any Club with twenty ewes.

For information on any of the above  
policies, write.

Live Stock Division,  
Department of Agriculture,  
FREDERICTON, N. B.  
Hon. J. F. Tweeddale,  
Minister,  
FREDERICTON, N. B.

A young Scotsman who married an  
English lady, and some time after-  
ward he paid a visit to a bachelor un-  
cle.

"Well, Sandy I hear ye have gotten  
a wife," said the old man.

"Yes, uncle."

"What can she dae?"

"Dae? What do you mean?"

"Weel, the uncle went on, "can she  
sow an' knit? Does she mend your  
claes?"

"No," the young man admitted.

"Humph!" commented the uncle.

"Weel, does she cook? Can she make  
parritch?"

"O, no, uncle," the young man ex-  
plained. "The servants do all those  
things. But you should hear her  
sing. She has the most beautiful  
voice you ever heard."

"Sing!" repeated the old man,  
scornfully. "Man, could ye no hear  
your own canary?"

Her Only Rival.

"How nicely you have ironed these  
things, Jane," said the mistress, ad-  
miringly, to her maid. Then, glanc-  
ing at the glossy linen, she continued  
in a tone of surprise: "Oh, but I see  
they are all your own."

"Yes," replied Jane, "and I'd do all  
your just like that if I had time."

NO STRIKING THERE.

The ship and mill men strike, the  
carpenters strike, the milkmen strike,  
the railroad employees strike, but the  
country editor plugs right along. He  
had hard enough work getting people  
to pay their subscriptions as it is.

What would happen if he struck for  
higher wages?—And, too, for shorter  
hours—when he has to serve all pos-  
sible from office desk, to editorial  
chief, he'd rather strike for longer  
hours, but that's impossible for there  
are only twenty-four hours in a day.
