Murphy, Kennedy Stinson, C. H. Thompson, and Peter Gillespie, president. A programme is being arranged for the visitors to the exhibition.

The Hespeler Machinery Company, Limited, Hespeler, Ont., has been incorporated with a capital of \$100,000. The incorporators are: W. G. Chater, Hespeler, Ont.; T. F. Campbell, M. A. Secord, A. Wilson, and others, all of Galt.

Heenan & Froude, Limited, engineers, of Manchester and Worcester, have been awarded a bronze medal by the Royal Sanitary Institute in connection with the model of a refuse destructor exhibited by them at the Health Exhibition, held at Cardiff July 1908.

The University of Pittsburg on Friday, February 12th, honored Mr. Edward G. Acheson, president of the International Acheson Graphite Company of Niagara Falls, N.Y., by conferring upon him the degree of Doctor of Science. The convocation was held in Carnegie Music Hall and was in commemoration of the birth of Abraham Lincoln and Charles Darwin. It was made memorable by the presence of James Schoolcraft Sherman, vice-president-elect. The degree of Doctor of Science was conferred upon Mr. Acheson because of the many successes he has scored as results of his scientific research. It was Mr. Acheson who gave to the world the abrasive known as Carborundum, also the product Siloxicon, as well as Artificial Graphite. His electric furnace work has given him prominence as the greatest electric furnace expert in the world. His work has added very materially to the world's wealth and will be of material assistance in the future conservation of our natural resources, particularly so in the case of lubricating oils, as his latest process for deflocculating graphite and applying it to lubrication is esteemed and appreciated as a factor destined to largely conserve the world's supply of lubricants. The extent to which his possible developments will reach is as yet unknown, but there can be no question as to the ultimate great general benefit.
