

Some very promising puppies were exhibited.

GREYHOUNDS.—Champion Balkis was not in perfect condition. He however remains unexcelled in many points still. No dog among the hounds shown at Toronto approached him in the way he was ribbed, or in the let-down of his legs at the hock and in various other points. In the open class, the winning dog was readily enough first, though the 2nd is a good one, shown too thin. He is also defective in loin, but has grand legs and feet. The 3rd dog an immense brindle, well made, but a little loaded in shoulder and with a head and neck looking too small for his body. We liked better the 3rd prize winner among the bitches, also a dark brindle. The 1st bitch is a strongly made and symmetrical specimen.

BULL-DOGS.—There were three good ones. Lion excels Portwood Tiger in head and forelegs and carriage, but is very weak in hind parts especially. P. Tiger stands badly on his fore legs which are anything but straight. Met is a bitch of good general proportions and has few glaring faults.

BULL-TERRIERS.—Dogs and bitches were included in one class. The winners of 1st were decidedly better than the others.

FOX-TERRIERS.—This class was disappointing to the expert. Not a single one of them could be pointed to as illustrating exactly the right thing in head; upon the whole we preferred the best of the wire-haired. In judging, the best dog and the best bitch for the special, they should have been more carefully compared. The 1st puppy is a dog of fine body and quality; the only other one noticed got only a V. H. C. and was hardly treated, she should have stood higher. The 1st and 2nd dogs in the wire haired class were both good but the bitches all inferior to the dogs.

BEDLINGTON AND IRISH TERRIERS.—Were few and only fair in quality. There

were no Skyes, Airedales, &c., but a riot of Scottish, the winners being first rate.

YORKSHIRE TERRIERS.—Had several entries, 1st went to Champion Dolly, a dog of fair body and long and most beautiful coat, but not approaching the standard in colour. The 2nd is a beautiful dog, though it were better that his black were a blue. Every dog in the class deserved recognition, and the one passed over would have had a card if the judging had been uniform.

TOY TERRIERS.—A weak class in both the smooth and rough haired varieties.

TOY SPANIELS.—Were but few and only moderately good.

PUGS.—As a class were small enough but not squarely enough built, or large enough in head. The 1st dog had beautiful ears and mask, but the muzzle was too long and shallow. He was generally good in colour but smutty in parts. The 2nd was much behind in color and some other points.

BLACK AND TAN TERRIERS.—A pretty strong class. The 1st dog excels in quality, head, muzzle, chest, and carriage. He is a little too tucked up in loin; the 3rd a bitch, Desdemona, is too cobby and does not move quite well. The 2nd lies intermediate in excellencies and faults. Why are there not more of these handsome little dogs?

There was only one **DANDIE DINMONT**,—a fairly good specimen, from the Meadowthorpe Kennels which have sent so many fine dogs to this show and have thus placed us all under obligations. This Kennel also sent a first rate curly coated Retriever.

We hope the management next year will provide some place where the dogs' crates may be kept dry.
