## A HARD PULL.

Poor horses! Don't you pity them? What a hard pull they are having! And does it not seem cruel that the driver should lash them in that way? Poor things; they are doing their best I am sure I hope, when they once get up on the level he will stop using the whip. Probably he will, for I guess he is not as cruel a man as he looks. Perhaps it is necessary to urge them on to special effort, so as to get out of the hole.
