## PARTIES WANTED

to furnish fees for procuring patents for in-  
ventions against interest therein, or all  
interest against consideration.

It is a well known fact that many  
valuable inventions are only patented in one  
or two countries, or not at all, for want of  
means to procure patents or opportunity to  
work them. The proprietor of THE PATENT  
REVIEW has had hundreds of offers to procure  
patents at his expense, or to find persons  
willing to find the fees on consideration of  
a share of the patent assigned to him. This  
column is reserved for such offers.

The Inventor of an extremely simple  
and effective electric attachment to alarm  
clocks, causing the alarm to ring until it is  
stopped by someone, is prepared to assign an  
undivided one half interest to any person  
who will pay the fees for procuring a patent  
in any one country. Has been practically  
tested. Applications to be addressed to  
"Alarm," care of THE PATENT REVIEW.
